

An on-farm facilitated workshop.

Come and visit our research dairy farm just outside of Christchurch and experience the rural environment. Students explore cow's behaviour and feed requirements, management decisions and environmental impacts. Content will include research that Lincoln University has done around nitrogen leaching and the different research to improve farming outcomes for the environment, cows, and industry.

- **Free to attend.**
- **4-hour session recommended from 10am-2pm.**
- **Health and safety plans are provided.**
- **Suitable for up to 50 students.**

Agriculture, Science and Geography classes are welcome. The program is aimed at Year 11 but also suitable for Year 10's.

Bookings for 2024, Term 1 Week 3 (12th - 16th Feb) and Week 4 (19th Feb - 23rd Feb), are open.

Note: small classes are welcome (less than 20 students) and may share the day with another small school group.

To reserve your spot email Lauren Roberts (lauren.roberts@lincoln.ac.nz) with your name, school, subject, year level and estimated class numbers, preferred date and another date in case the first is taken.
