

Food Safety and Security Half-day Workshop

4 August 2015

Introduction

Food safety and security plays a critical role in the success of the global economy and the development of markets for food products.

Increasingly complex and globalised food manufacturing has increased the risk of microbial and chemical contamination in raw materials, and in processing and storage.

This has necessitated the development of new identification, monitoring and remediation systems in food safety and security.

This workshop will address these developments by delivering the latest science-based information on food inspection and quarantine, international food hygiene standards, food poisoning, foodborne diseases, and processing best-practice.

This is an opportunity to learn from experts and discuss in an open forum the challenging and critical issues relating to food safety and security.

Course contents

- Global food safety and security - the current situation
- New Zealand's role in the global food supply
- Impact of environment and climate change on food security
- Food production systems and security
- Microbial contamination and food security

Speakers:

1. **Charles Brennan** Professor of Food Science, Lincoln University
2. **Ravi Gooneratne** Associate Professor of Toxicology, Lincoln University
3. **Malik Hussain** Senior Lecturer in Food Microbiology, Lincoln University
4. **Stephen On** Chief Scientist, ESR
5. **William Riley** Professor
Jinan University Guangzhou China

Overview

This half-day workshop offers practical knowledge of the current industry challenges for food safety and security.

The information provided is designed to assist industry professionals in achieving better outcomes in their respective fields.

Who should attend?

- Food producers and processors
- Food exporters and importers
- Food policy makers and regulators
- Agriculturists
- Animal scientists
- Food scientists
- Food safety professionals
- Researchers
- Industry representatives
- Analytical chemists
- Government representatives.

Course details

Cost: \$99 excluding GST - Includes course materials, certificate of completion and refreshments.

Coordinator: Dr Malik Altaf Hussain, Senior Lecturer in Food Microbiology, Lincoln University.

Address: RFH Building, Lincoln University, Lincoln, New Zealand.
