## Evacuation Process

# Evacuation

- Earthquake safety and room evacuation
- Identify nearest exit points
- If you feel an earthquake – DROP, COVER, HOLD
- Evacuate normally to the muster area
- If building is damaged get out - stairs

# Earthquake specific

- If in doubt get out – still relevant BUT
  - ✓ Need to assess risk & outcomes
  - ✓ Risk of evacuation
  - ✓ Risk of staying in building – single – multi-storey etc
  - ✓ Hazards standing outside
