

# Food Safety Risks in Animal Products Supply Chain One Day Short Course

12 August 2015

## Introduction

This course provides attendees with key knowledge of the factors affecting the food safety of animal-based products (meat, poultry, milk and eggs) throughout the supply chain. This short course will give you the understanding of the ways in which food safety and profitability can be maximised through production, distribution and retail of safe animal food products.

## Course content

- Animal products food safety (farm to plate)
- Processing and food safety hazards
- Animal production as a source of food safety hazards
- Microbiological risks of animal products
- Managing food safety at farm, post-harvest and consumer products
- Regulatory requirements for domestic and international markets.

## Speakers

1. **William Riley** Professor of Food Safety, Jinan University China
2. **Ravi Gooneratne** Associate Professor Food Toxicologist, Lincoln University
3. **Dr Malik Hussain** Food Microbiologist, Lincoln University
4. **Dr Mustafa Farouk** Senior Scientist, Food Assurance & Meat Quality, AgResearch

## Benefits to attendees

This one day short course on food safety risks associated with animal products in supply chain (farm to plate) is designed to assist the industry and its associated companies to train or upskill new and existing staff.

## Who should attend?

- Animal farm managers and staff
- Agriculturists
- Animal scientists
- Food scientists
- Food safety professionals
- Academic scientists and researchers
- Food producers and processors
- Food exporters and importers
- Food policy makers and regulators
- Industry representatives
- Analytical chemists
- Representatives of government agencies.

## Course details

**Cost:** \$199 excluding GST – Include course material and a certificate of completion. Lunch and refreshments also provided

**Coordinator:** Dr Malik Altaf Hussain, Senior Lecturer in Food Microbiology, Lincoln University

**Address:** RFH Building, Lincoln University, Lincoln, New Zealand
