

Investigate alternative agri-environmental farming systems

**ELLS Summer School
20-31 August 2018
Lincoln University
Christchurch,
New Zealand**

Enrol in Lincoln University's Agri Environmental Landscape Management course, LASC 616, and take part in designing and evaluating more sustainable farming futures.

You will be exploring alternative futures for Mount Grand, a 1600 ha sheep station located in one of New Zealand's most beautiful and culturally significant landscapes, the High country in Central Otago.

This course will investigate and evaluate the major scientific, agronomic, and cultural challenges in establishing and implementing effective management regimes that fully integrate agronomic practices with environmental protection, biodiversity and landscape values.

Enrol now and take part in exploring the future of high country rangeland farming systems.

Course applications close on March 30, 2018.
