

**LINCOLN**  
UNIVERSITY  
TE WHARE WĀNAKA O AORAKI

## STAR Programme lets you get a head-start on your degree while you are still at school

Grow your opportunities with free online study at Lincoln University through the STAR Programme, learning about the global food system and land-based issues which affect us all.

Start your journey early towards gaining a highly sought-after qualification from New Zealand's specialist, world-ranked, land-based university and take your place in the thriving food and fibre sector.

Earn a scholarship for your first year at Lincoln.

STAR (Secondary Tertiary Alignment Resource) allows you to enrol in first-year degree-level courses while in Year 12 or 13.

Study online at a higher level in a supported learning environment at Lincoln University, with regular tutorials.

### With STAR at Lincoln University you can study:

**MGMT 106** Global Food Systems

Learn how food systems work in a global context, and begin your journey to further study in agribusiness.

**LINC 101** Land, People and Economies

Discover the land-based issues in society which affect us all, including the major drivers of land use change and their biophysical, ecological, social, economic and cultural implications.

### Fees

There are no fees associated with STAR courses.

### Credits to my first-year courses?

Upon successful completion of the course you will be provided with a letter of completion and these courses may be credited to your chosen degree, if eligible, once you gain University Entrance.

### Scholarships are available to top students

If you earn an A grade and go on to enrol in a Lincoln University degree you'll receive a scholarship for your first full year of study.
