Lincoln University
Areas of Specialisation

Agriculture, Horticulture & Viticulture
Lincoln University is proud
to help grow your future.

As the longest running agriculturally based university in the Southern Hemisphere, Lincoln’s story begins with farming but it certainly doesn’t end there. As New Zealand’s economy has diversified so have we. What we are interested in growing is people.

Now more than ever, we are enabling our students to grow to meet urgent industry demands in areas such as food, fibre, sustainability, agribusiness and more.

At Lincoln, we offer great learning and growth through powerful applied research, deep industry collaborations, global connections and world-class learning environments and teaching.

As a Lincoln graduate you’ll arrive at your career globally connected, forward thinking and ready to shape tomorrow.

Lincoln is a safe haven that will offer you a wealth of opportunities to develop leading-edge skills here and in the real world. Just as importantly, you will become part of a thriving and inclusive student community, forging friendships that will last a lifetime.

We truly look forward to helping you grow.

Things grow when the conditions are right.

It’s true for industry, agriculture and it’s most certainly true for people. At Lincoln University, helping you grow is what we are all about.

And we encourage you to do it your way, with diverse learning that fits your ambitions in an environment that allows you to flourish.

We partner you with industry to prepare you for the real world and to plant the seeds of a rewarding future.

So when the time comes, you’re ready to go out there and grow the future for yourself and others.

Welcome to Lincoln University.
A place to grow.
Welcome to Canterbury
Our campus is located in the Lincoln township, a thriving village on the Canterbury plains. Lincoln is small and very friendly. It boasts local pubs, great cafés and eateries, shops and even its own farmers and craft market. Twenty minutes away is Ōtautahi Christchurch, which is transforming itself into one of the world’s most sustainable cities. Its rapidly evolving culture and energy makes it ideal for students. And no more than a couple of hours from Ōtautahi Christchurch, Canterbury offers a huge range of exciting recreational options in areas of incredible natural beauty – you can bungy jump, hike, mountain bike, raft, surf, swim, play golf, shop, visit wineries and gardens, and so much more.

Choosing Lincoln University
At Lincoln, we’ve got a solid reputation for offering the finest, most industry-relevant learning programmes. And we’d like to make you a part of that. As New Zealand’s leading land-based university, our specialised subject areas are all about harnessing the value of the land to help make the world a better place.

We’ve got strong industry ties to ensure that your learning lines up with what businesses need. Loads of our students gain work experience while they study, picking up real skills for the real world. You can’t put a price on that. We’re the smallest university in New Zealand, which means a more personal learning environment, extra face time with lecturers and a friendly, village atmosphere.

Māori and Pasifika
Lincoln University is a great place for Māori and Pasifika students to gain an excellent qualification in a fun, friendly and supportive environment.

We offer a values-based programme of manaaki (support) for Māori students called Manaaki Taura that offers academic support, internships and practical work opportunities.

We’re also committed to helping to develop the next generation of Māori and Pasifika leaders by offering industry-relevant, career-oriented programmes with support from Te Manutaki - the Māori and Pasifika Team.

International students
Our students hail from around 80 different countries throughout the world. This makes Lincoln University a truly global network and a diverse, exciting place to be.

We hope you will join us soon.

Lincoln and the Canterbury region
and gardens, and so much more. surf, swim, play golf, shop, visit wineries of incredible natural beauty – you can Canterbury offers a huge range of hours from Ōtautahi Christchurch, And no more than a couple of

Why Lincoln University?
At Lincoln University, we love our green and vibrant village full of like-minded people. There’s always something to get involved in and the vibe is super friendly. Here are just a few of the things available to you as a Lincoln student.

Join the club.
Looking for great ways to meet new people, broaden your horizons and have some fun? Join a club. The Lincoln University Students’ Association (LUSA) and the Whare Hākinakina LU Gym oversee all of our clubs and organisations. We can fill you in on what’s out there or even help you set up your own club.

Help is here.
Every student needs a little help now and then. That’s why we have support services for every area of student life. And they’re there for you whenever you need them. Whether it’s budgeting advice, help with a physical or mental health problem or you just want someone friendly to talk to, we’re on your side.

LUSA. They’re for you.
The good people at the Lincoln University Students’ Association are all about making student life the best it can be. Independent from the university, they offer impartial advice and look after your student rights. LUSA is committed to the Treaty of Waitangi and they help represent our Māori students at Lincoln. They also organise awesome and affordable events from lunchtime sausage sizzles to the legendary end-of-year Lincoln University Garden Party.

Follow us and keep up to date

Bridging the gap.
Urban meets rural at Lincoln, with students arriving from bustling cities, remote country farms and everywhere in between. They all find their place at New Zealand’s top land-based university and they tend to leave as lifelong friends.

Read it in RAM.
RAM is our infamous, entertaining and essential Lincoln student magazine. It’s your monthly fix of satire, legend, inside word and even the occasional serious and factual article. Don’t miss it.

Great care for little ones.
Our philosophy of helping people to grow also extends to our fantastic childcare centres. We create an environment that promotes wonder and play as central to learning. Children of all cultures love it, which makes it much easier for their parents to concentrate on studying.

Stellar coffee.
Where there are university students, there are also great cafés. And in our case, they’re well worth a visit or two. If you’re after a coffee to get your brain going, head to our fantastic student space, Grounded (which includes an awesome espresso bar), or our central café, Mrs O’s.

This way up.
Need a bit of pointing in the right direction? There are plenty of people on campus to talk to about career and employment advice. If you want to discuss job possibilities or need to find a part-time gig while you study, we’re here and ready to help.

Lincoln University
Primary production is the foundation of our national economy and that is truer now than ever. Demand for university graduates well exceeds supply and our students are sought-after across all areas of the sector. As New Zealand’s leading agricultural university, we have a long history of supporting the land-based industries to increase their productivity and sustainability. This trend is set to continue, with a 70 percent increase in global food production required by 2050 to feed an additional three billion people worldwide. Thousands of extra jobs will open up, with skyrocketing international demand for New Zealand exports such as meat, milk, fruit and vegetables, and wool. There’s never been a better time to enter the industry.

Our agriculture and horticulture programmes cover a wide range of disciplines, including biology, chemistry, and plant, animal and soil science, as well as management skills. The practical experiences we offer set us apart from other universities and prepare you to make an immediate difference to the industry. Employment opportunities are wide-ranging, from farm and horticultural consultancy to rural banking and valuation careers, agribusiness roles, and working for the fertiliser, seed and livestock industries.

We also lead the way in viticulture, having established the first tertiary-level cool climate wine production programme in the English-speaking world. Our Centre for Viticulture and Oenology is a top research organisation designed to help increase the economic value of the New Zealand wine industry. Many of our viticulture graduates are working in leading winemaking regions all over the globe, from Auckland to Wanaka, from Asia to the United States of America.

Agriculture, Horticulture & Viticulture

Qualifications
- Diploma in Agriculture
- Diploma in Farm Management
- Diploma in Horticulture
- Diploma in Horticultural Business
- Diploma in Horticultural Management
- Bachelor of Agriculture
- Bachelor of Agricultural Science
- Bachelor of Agricultural Science with Honours
- Bachelor of Agribusiness & Food Marketing
- Bachelor of Commerce (Agriculture)
- Bachelor of Commerce (Agriculture & Professional Accounting)
- Bachelor of Commerce (Horticulture)
- Bachelor of Land & Property Management
- Bachelor of Viticulture & Oenology
- Bachelor of Viticulture & Oenology (Honours)
- Graduate Diploma in Viticulture & Oenology
- Postgraduate Diploma in Horticultural Science
- Postgraduate Diploma in Agricultural Science
- Master of Agricultural Science
- Master of Applied Computing
- Master of Commerce (Agricultural)
- Master of Horticultural Science
- Master of Management in Agribusiness
- Master of Management in Agricultural Systems
- Master of Precision Agriculture
- Master of Wine & Viticulture
- PhD

Lincoln University's areas of specialisation

Our nine areas of specialisation are designed to help you tailor your learning to your ambitions. Each area contains a range of practical study programmes that you can mix and match to gain the breadth of knowledge and expertise needed for success in your chosen field.

Lincoln University areas of specialisation

- Agriculture, Horticulture and Viticulture
- Business
- Environment
- Food, Wine and Beer
- Landscape Architecture
- Property and Valuation
- Science
- Sport and Recreation
- Tourism

The purpose of this booklet

Our agriculture, horticulture and viticulture programmes will prepare you to play a part in meeting the major demand for university graduates in some of the world’s most enduring professions.

This booklet outlines the qualifications within the specialisation and explores potential career outcomes, as well as providing valuable information on how to get where you want to be. We cover pathways our graduates have taken, offer insights into the journeys of some of our current students, and throw some real-world facts into the mix.

Ultimately, this book will assist you in making the right choice to grow your future.

To see the full range of qualifications on offer, visit: www.lincoln.ac.nz
Diploma in Agriculture and Diploma in Farm Management

Study for these flagship diplomas and you’ll be well on your way to helping maintain New Zealand’s position as a top agricultural producer and exporter. Get started with the Diploma in Agriculture (DipAg) for a solid grounding in the basics, then continue on to the Diploma in Farm Management (DipFM), which will equip you with essential farming and business management skills.

Enhance your knowledge of agriculture and farm management and prepare to hit the ground running in a professional environment. You’ll need to complete the DipAg before continuing on to the DipFM, which is perfect if you’re seeking a management career in agribusiness.

Key features
For the Diploma in Agriculture, you will learn about:
- Computing and communication
- Farm management systems
- Business planning
- Plant husbandry
- Soils and soil management
- Livestock production systems
- Plant and animal health
- Engineering

If you decide to continue with the DipFM, you will study aspects of agribusiness planning and management, such as:
- Land purchase and ownership
- Financial and taxation management
- Risk and uncertainty
- Agricultural law
- Machinery ownership
- Labour management

Electives for the Diploma in Farm Management include:
- Beef and deer production
- Dairy production
- Sheep production
- Engineering
- Annual crop production
- Pasture management
- Applied agroforestry

Career opportunities
Equipped with a Diploma in Agriculture and a Diploma in Farm Management, you’ll be ready for any number of management positions on farms or in the agribusiness sector.

Entry requirements
One of the following:
- NCEA Level 2, a minimum of 40 credits over four subjects recognised by Lincoln University as suitable for entry. The literacy and numeracy requirements for university entrance are also required.
- A New Zealand Certificate in Agriculture at Level 4 or higher obtained through an approved polytechnic institution.

Recommended preparation
- Agriculture/Horticulture*
- Biology*
- Chemistry
- Computing
- English*
- Māori Studies
- Maths/Statistics

*Highly recommended subjects

Intake semesters
You can start in:
- Semester 1 (late February)
- Semester 2 – regional delivery only (early July)

Practical Work
Practical work requirements for the Diploma in Agriculture include:
- Working for 12 weeks in total on two different farm types, with at least six on each type of farm or one farm and an Allied industry
- Completing at least six of the 12 weeks before beginning study

To pass the practical work component, you’ll need to demonstrate:
- Competence in driving vehicles
- A physical aptitude for working on farms without endangering yourself or others.

The advanced Diploma in Farm Management requires a further year of academic study and an additional 44 weeks of practical work.

You will also be required to meet the reporting requirements for your practical work.

Please contact the Practical Work Coordinator for further information or phone +64 3 423 0061.

Matt Walker
Diploma in Farm Management
Diploma in Horticulture and Diploma in Horticultural Management

Study for a Diploma in Horticulture and get the start you’re looking for in this important area of New Zealand’s land-based economy. Want to move into management in the horticultural or agribusiness industries? Then go on to complete the Diploma in Horticultural Management. The further year of study will give you the applied skills and academic knowledge you need to enhance and hone your decision-making abilities.

Prepare to begin working in the horticultural industry by enhancing your knowledge of a broad range of essential topics, then take your learning to the next level with the Diploma in Horticultural Management.

Key features
For the Diploma in Horticulture, you will learn about:
• Computing and communication
• Horticultural management systems
• Propagation and Nursery
• Soils and soil management
• Plant health
• Plant studies
• Engineering
If you decide to continue with the Diploma in Horticultural Management, you will study aspects of horticultural business, such as:
• Analysis and planning in horticultural business
• Contemporary industry issues
• Employment relations and issues
• Land laws
• Labour management

Electives for the Diploma in Horticulture include:
• Agriculture/Horticulture
• Biology
• Chemistry
• Computing
• English
• Māori Studies
• Maths/Statistics

Recommended preparation
• Agriculture/Horticulture
• Biology
• Chemistry
• Computing
• English
• Māori Studies
• Maths/Statistics

Intake semesters
You can start in:
• Semester 1 (late February)
• Semester 2 (early July)

Practical Work
Practical work requirements for the Diploma in Horticulture include:
• Working for 12 weeks in total on two different types of horticultural units

The advanced Diploma in Horticultural Management requires a further year of academic study and an additional 44 weeks of practical work.

Please contact the Practical Work Coordinator for further information or phone +64 3 423 0061.

Horticulture is one of the most crucial and fastest-growing industries in the world. It’s filled with a broad range of opportunities and huge potential for innovation and technology.

ERE
New Zealand is a world leader in agriculture. Lincoln University plays a big part in that reputation by producing world-leading agricultural specialists. This degree offers deeper learning in plant, animal and soil sciences plus farm management to help you become outstanding in your field.

Key features
• Gain in-depth knowledge of the animal, plant and soil sciences
• Learn about the workings of primary industry and plant production systems
• Undertake practical work on a farm in an allied industry of your choice
• Use farm-collected data to investigate improving feed and nutrient management.

Career opportunities
With a Bachelor of Agriculture from Lincoln University, you’ll be an ideal candidate for a rewarding career in areas like soil consultancy, farm management, agronomy, research or environmental advisory roles.

Entry requirements
University Entrance through NCEA, or an approved equivalent qualification
• If English is not your first language other entry requirements will apply. Learn more about English language requirements here: www.lincoln.ac.nz/english-requirements

Recommended preparation
• Agriculture/Horticulture
• Biology*
• Chemistry*
• Computing
• English*
• Māori Studies
• Maths/Statistics*
*Highly recommended subjects

Practical work
During your degree, you’ll need to complete 28 weeks of paid full-time practical work. This can include:
• Working on one dairy farm for 10-14 weeks
• Working on a sheep or beef farm for 10-14 weeks
• Using any remaining time to work on a different type of farm or in an allied industry of your choice.

Previous farming experience is preferred but not essential.
To pass the practical work component, you’ll need to demonstrate:
• Competence in driving vehicles (previous experience driving tractors or trucks would be an advantage)
• A physical aptitude for working on farms without endangering yourself or others.

For more information, please email the Practical Work Coordinator at practicalwork@lincoln.ac.nz or phone +64 3 423 0061.

Bachelor of Agricultural Science

This qualification has produced some of the best leaders, thinkers and doers in the agricultural sector for over 140 years. Plus, if you really want to set yourself apart from the herd, you can undertake an original research project on a chosen topic in animal science, plant science, soil science or farm management to complete your degree with honours.

If you want a career helping farmers meet the demands of international markets with environment-friendly ways of getting food from the paddock to plate, you’ll find the grass is always greener at Lincoln.

Key features
• Gain in-depth knowledge of animal, plant and soil sciences
• Learn how primary industry, agricultural, and plant production systems work
• Undertake practical work on a farm in an allied industry of your choice
• Use data from farms to investigate ways to improve feed and nutrient management.

Career opportunities
With a Bachelor of Agricultural Science from Lincoln University, you’ll be an ideal candidate for a rewarding career in areas like consultancy, research, technical roles and farm management.

Entry requirements
University Entrance through NCEA, or an approved equivalent qualification

Bachelor of Commerce (Agriculture and Professional Accounting)

Get ready to be equipped for leadership in the farming, agribusiness and accounting sectors. This four-year degree includes components of farm management, agricultural production, accounting and business courses. You’ll graduate well ahead of the curve.

The farming sector needs excellent accounting skills like cows need grass. Want to put expert farming knowledge and your skills with numbers to work in a key New Zealand industry? Here’s the degree for you.

Key features
With this degree, you’ll meet the academic requirements for Professional Accounting bodies:

- CPA (Certified Practising Accountants) Australia, one of the world’s largest accounting bodies
- Chartered Accountants Australia and New Zealand (CA ANZ), a leading professional association of leaders in business and finance in Australia and New Zealand
- Association of Chartered Certified Accountants (ACCA), a network of finance professionals across the globe that give you meaningful connections and industry credibility.

Career opportunities
As a Bachelor of Commerce – Agriculture and Professional Accounting graduate, you will be well equipped for leadership roles in agribusiness and right across the accounting sector.

Bachelor of Commerce (Horticulture)

Prepare for a management position in the horticultural and food industries and meet a strong demand for professionals who can cater to increasing global pressure for high-quality food. The Bachelor of Commerce (Horticulture) will give you the skills and knowledge to pursue a career in a management or advisory role.

Business skills are also needed in associated areas such as the agrochemical, fertiliser and horticultural machinery distribution industries, so there will be a wide range of career possibilities open to you when you graduate.

Key features
- Develop an in-depth understanding of the bio-physical environment and biological production systems as they relate to horticultural production
- Learn to communicate a clear, fluent understanding of real-world horticultural business issues.
- Learn about the characteristics of the horticultural industry and the theoretical concepts that underpin its operation and management
- Discover how to analyse the likely impacts of new technologies and innovative practices in the horticultural sector
- Learn to apply appropriate approaches, methods and tools to analyse, evaluate and solve problems related to horticultural production and agribusiness management and marketing issues
- Integrate theory and practice from different disciplines to evaluate complex social, economic and technical aspects of global horticultural systems
- Understand the bio-physical environment and biological production systems and their impact on horticultural production
- Understand the theoretical and practical aspects of the horticultural industry
- Discover how to analyse the likely impacts of new technologies and innovative practices in the horticultural sector
- Learn to apply appropriate approaches, methods and tools to solve problems related to horticultural production and agribusiness management and marketing issues
- Integrate theory and practice from different disciplines to evaluate complex social, economic and technical aspects of global horticultural systems

Practical work
You’ll need to complete at least 30 weeks of practical work during your degree. This could be either:
- 2 horticultural placements of 15 weeks each, or
- 2 horticultural placements of 10 weeks each plus an allied placement of 10 weeks.
The minimum placement is 10 weeks per workplace. The maximum placement is 15 weeks. Two reports are required.

For more information, please email the Practical Work Coordinator at practicalwork@lincoln.ac.nz or phone +64 3 423 0061.

The goal of the programme is to provide business and management skills that directly apply to the specific and complex nature of the horticultural industry. Extensive feedback from the industry suggests that higher level academic training will be needed for managerial staff.

Professor Alison Bailey
Head of Department, Land Management and Systems
Bachelor of Viticulture and Oenology

Behind every great wine there’s a lot of high quality science and sound management. This specialist degree will prepare you for a rewarding career in a fascinating industry that can take you to some of the best places in the world.

This degree covers wine preparation, advanced viticulture and wine science, pest and disease management, biometrics and wine chemistry. Our graduates are highly sought-after and if you’re one of them, you can look forward to great career opportunities all over the world.

Key features
• Receive a solid grounding in the sciences, including biology, chemistry, and plant, soil and wine science
• Enjoy the opportunity to produce your own wine
• Discover the essentials of horticultural systems
• Learn the principles of wine science and wine quality assessment
• Develop an understanding of the wine supply chain from plant and soil sciences through to marketing and management of wine products.
• Lincoln University delivered one of the first cool climate wine production programmes, and we’ve been leading the way ever since.

Career opportunities
Employment options in the wine industry are many and varied. You could become a Viticulturist, Winemaker, Vineyard Manager, Cellar Manager, Winery Lab Manager, Marketing Manager or Sales Representative.

Entry requirements
University Entrance through NCEA, or an approved equivalent qualification
• If English is not your first language other entry requirements will apply. Learn more about English language requirements here: www.lincoln.ac.nz/english-requirements

Recommended preparation
• Agriculture/Horticulture
• Biology*
• Chemistry*
• Computing
• English*
• Māori Studies
• Maths/Statistics
*Highly recommended subjects

Intake semesters
You can start in either:
• Semester 1 (late February)
• Semester 2 (mid July)*
There are also options for starting in summer semesters, although the range of courses available would be limited.
*Please obtain course advice if you are thinking about this option.

Additional major
There may be an opportunity to add an additional major to your programme of study. Please refer to the programme course advisor for further information.

Practical work
You’ll need to complete 18 weeks of practical work during your degree. This must include a minimum of 6 consecutive weeks in both:
• A commercial vineyard
• A commercial winery
In addition to this, you can complete 6 weeks practical work in an allied industry such as wine bar or shop, winery laboratory or brewery. Alternatively, you can complete up to 12 weeks in your vineyard or winery practical work placement.
For more information, please email the Practical Work Coordinator at practicalwork@lincoln.ac.nz or phone +64 3 423 0061.

Bachelor of Agribusiness and Food Marketing

Did you know food and beverage makes up 69% of New Zealand exports? As populations grow faster than resources, demand for innovative ways to produce and market food grows too. Underpinned by our strong history in agriculture and agribusiness, this degree offers you excellent working knowledge of global agribusiness and food marketing, not to mention tasty career options in key fields.

Key features
- Gain the only specialised food marketing degree in the Southern Hemisphere
- Become work-ready and highly employable in agrifood sectors in New Zealand and around the world
- Gain promising career options in everything from supplier management to product development and marketing.

Career opportunities
This degree will equip you for roles in areas such as food marketing and communications, product innovation, logistics and supply chain management, business development in dairying, wine and agriculture, and arable industries, processed food and beverage companies, product sales, and customer service.

Entry requirements
University Entrance through NCEA, or an approved equivalent qualification
- If English is not your first language other entry requirements will apply. Learn more about English language requirements here: www.lincoln.ac.nz/english-requirements

There are also options for starting in summer semesters, although the range of courses available would be limited.

*Please obtain course advice if you are thinking this option.

Addional major or minor
There may be an opportunity to add an additional major to your programme of study. Please refer to the programme course advisor for further information.

Practical work
You’ll need to complete 18 weeks of practical work during your degree. You must undertake at least 12 of these weeks in different areas. This must be undertaken in two different areas with a maximum of 12 weeks in any of the following:
- An agricultural production based enterprises i.e. farms of all types including livestock, crop, horticulture, vineyards and aquaculture
- An associated processing industries such as food factories, wineries and meat works
- An associated processing industries such as food factories, wineries and aquaculture
- A distribution, logistics, transport, distribution centres, cool stores, etc
- A marketing, import/export, retail, wholesalers, etc.

For more information, please email the Practical Work Coordinator at practicalwork@lincoln.ac.nz or phone +64 3 423 0061.

Bachelor of Land and Property Management

This programme is the perfect place to start your career as a land and property professional. It’s one of the most comprehensive degrees of its kind in Australasia, has had a 100% graduate employment rate and you can even do a semester overseas. Ready for a closer look?

Key features

- Study urban property or rural property or specialise by adding a major like accounting, finance, investment, or environmental management
- Gain a degree that is accredited by the Property Institute of New Zealand, the Valuers Registration Board, the Institute of Valuers, the Real Estate Agents Authority, and the Royal Institution of Chartered Surveyors.
- Benefit from a huge range of career options
- Be taught by specialists in the field with international experience, and up-to-date insights into the industry.

Career opportunities

This degree will equip you for roles in areas such as valuation, property management, facilities and asset management, property development, investment and portfolio analysis, real estate brokerage, banking and finance, rural valuation, agricultural banking and finance, and farm consultancy.

Entry requirements

University Entrance through NCEA, or an approved equivalent qualification
- If English is not your first language, other entry requirements will apply. Learn more about English language requirements here: www.lincoln.ac.nz/english-requirements

Recommended preparation

- Accounting
- Computing
- Economics
- English*
- Geography/Social Studies
- Māori Studies
- Maths/Statistics

*Highly recommended subjects

Rural Valuation

You can start in either:
- Semester 1 (late February)
- Semester 2 (midJuly)*

There are also options for starting in summer semesters, although the range of courses available would be limited.

(a) Please obtain course advice if you are thinking about this option.

Primary Production Specialisation – course structure

The Primary Production Specialisation is an option in conjunction with the Rural Valuation major.

Compulsory courses:
- ANSC 105, MGMT 222, MGMT 318, MGMT 340
- Plus four of: PLSC 104, ANSC 213, FORS 270, PLSC 204, SOSC 224, ANSC 312, PLSC 320, PLSC 321, SOSC 320

Additional major or minor

There may be an opportunity to add an additional major or minor to your programme of study. Please refer to the programme course advisor for further information.

Practical work

You’ll need to complete practical work for both majors (urban and rural) during your degree.

Urban Major (12 weeks)
The Urban major requires you to complete 12 weeks practical work. This must include six consecutive weeks to be carried out with one employer.

Rural Major (30 weeks)
The Rural major requires an additional 18 weeks practical work experience in Primary Production and Allied Industries.

For more information, please email the Practical Work Coordinator at practicalwork@lincoln.ac.nz or phone +64 3 423 0061.

Accounting
Develop the accounting-based knowledge and skills to pursue a wide variety of business careers. This major will massively increase your employability, especially when coupled with a core business major. Learn to evaluate accounting issues in a business environment, use the latest tools and techniques to solve accounting problems and prepare and analyse accounts and finance reports.

Courses
The Accounting major consists of eight courses: one 100-level course, four 200-level courses and three 300-level courses. Courses selected at the 300-level for the major cannot be applied to any other qualification.

Economics
Use economics to solve real-world problems and gain the expertise to help address a range of global issues. You’ll develop the ability to quantitatively analyse New Zealand value chains (from primary production to end consumers), a skill that is highly sought after by employers.

Courses
The Economics major consists of eight courses: two 100-level courses, three 200-level courses and three 300-level courses. Courses selected at the 300-level for the major cannot be applied to any other qualification.

Environmental Management
This major is strongly aligned with Agriculture, Environmental Science, Tourism Management, Land and Property Management, Landscape Architecture and Recreation Management. If you’re studying for one of these degrees, this major will provide you with essential environmental management skills, leading to employment in the profession.

The public and political interest in environmental issues across a broad range of industries, along with increased media coverage, is likely to increase the importance of the environment in employers’ minds and create more careers for people with environmental management skills.

Courses
This major consists of eight courses, which is one-third of a 24-course degree. At least three of the courses are at the 300-level and no more than three can be taken at the 100-level. Courses selected at the 300-level cannot be applied to any other qualification.

Event Management
Gain the expertise to pursue a career as an event professional in a range of industries. Event management is a growing area of specialisation at tertiary institutions throughout Australasia and the world. The significance of events has spread beyond the traditional realm of tourism, sport and the arts into the corporate world and a range of other sectors, including hospitality and wine and food production. Corporations, organisations and local councils appreciate the value that events and festivals bring to businesses and local economies as they help to facilitate their role in encouraging community development and engagement.

Courses
The Event Management major consists of eight courses – three 100-level courses, two 200-level courses and three 300-level courses. Courses selected at the 300-level cannot be applied to any other qualification.

Global Business
Learn the management techniques required to run global organisations. Develop leadership and strategy skills and have the option of specialising in international marketing, international economics, or business sustainability management.

An emphasis on internationalisation of management, as well as management functions in multinational corporations, will offer employment opportunities all over the world.

Courses
The Global Business major consists of eight courses: two 100-level courses, three 200-level courses and three 300-level courses. Courses selected at the 300-level for the major cannot be applied to any other qualification.

Marketing
Develop the expertise to make the right marketing decisions for businesses, consumers, society and the environment. Become aware of the profession’s social, ethical, moral and legal standards and their impact on society. You’ll learn the concepts and tools to be a productive and responsible marketing professional.

Courses
The Marketing major consists of seven courses: two 100-level courses, two 200-level courses and three 300-level courses. Courses selected at the 300-level for the major cannot be applied to any other qualification.

Finance
Finance lies at the heart of business operations and is a dynamic field within the modern global economy. Develop the advanced knowledge and skills to become a finance expert so that when you join the workforce, you can effectively adapt to a rapidly changing business environment.

As New Zealand becomes more dependent on global value chains, greater numbers of university graduates will be required in many industries.

Courses
The Finance major consists of eight courses: three 100-level courses, two 200-level courses and three 300-level courses. Courses selected at the 300-level for the major cannot be applied to any other qualification.

Supply Chain Management
New Zealand is becoming more dependent on long, complex and vulnerable global supply chains for both imports and exports. Gain a solid grounding in sustainable supply chain practices and the legal framework of global business and prepare to work in supply chain managerial roles within any land-based, manufacturing or service industry. Supply chain management is taught from a systems perspective, to add value to producers, distributors and consumers.

Courses
The Supply Chain Management major consists of eight courses: two 100-level courses, three 200-level courses and three 300-level courses. Courses selected at the 300-level for the major cannot be applied to any other qualification.

Tourism Management
A knowledge of tourism adds an extra level of expertise if you would like to work in a range of organisations charged with protecting the physical environment. To be more effective, planners, designers and developers need to understand the behaviour of tourists. Understanding the commercial differences of tourism compared with other sectors of the economy will be invaluable if you’re studying for a business degree.

Courses
The Tourism Management major consists of eight courses from the Bachelor of Tourism Management (15 credits). In addition, there are a number of ‘soft core’ options (30 credits). Courses selected at the 300-level cannot be applied to any other qualification.

Water Management
Water management is a particular challenge for New Zealand, given that the nation’s primary and tourism sectors are underpinned by high-quality fresh water and ecologically sustainable waterways. Waterways are diminishing in quality and water is over-allocated in many sub-regions. Develop the water management knowledge and skills to enter a career in the water, land or environmental management sector.

Courses
The Water Management major consists of eight courses, which is one-third of a 24-course degree. Courses selected at the 300-level cannot be applied to any other qualification.
Choose an additional major

If you're studying for a Lincoln University bachelor's degree, you may be able to include an additional major, which will add depth to your qualification. Please speak to your course advisor to ensure you pick up the right courses for you.

This table will help you to work out which additional majors you can study within your chosen degree.

Missed out on University Entrance?

Look no further than our Certificate and Diploma in University Studies, which will lead you into a bachelor’s degree programme.

The Certificate in University Studies (CUS) provides language, writing and study skills, along with concepts relating to communication and technology, mathematics, economics and environment. It can be completed fully online through new enhanced virtual courses.

Once you have successfully completed the certificate, you can transfer to the Diploma in University Studies (DUS).

The diploma takes you from a pre-degree stage to entry into the second year of a bachelor’s degree. Depending on your entry qualifications, you can complete it in two or three semesters.

You’ll develop your academic skills and study a range of courses from our bachelor’s programmes.

For more information visit www.lincoln.ac.nz/cus and www.lincoln.ac.nz/dus
Careers

Employers are always on the hunt for Lincoln graduates and our degrees open doors. Learn about some of the career opportunities that could come knocking once you’ve finished studying.

Agricultural/Horticultural Consultant
Kaitohutouh Ahuwhenua

Agricultural/horticultural consultants advise farmers, growers and organisations on business, production and land management solutions.

Pay
Pay for agricultural/horticultural consultants varies depending on experience and whether they work in the agriculture or horticulture sector.
- Agricultural/horticultural consultants with less than five years’ experience usually earn between $50,000 and $85,000 a year.
- Agricultural/horticultural consultants with more than five years’ experience usually earn between $85,000 and $150,000.
- Self-employed agricultural/horticultural consultants’ hourly rates range from $100 to over $150 an hour. Some earn more than $150,000 a year.

What you will do
Agricultural/horticultural consultants may do some or all of the following:
- Advise farmers and growers on how to improve the profitability, efficiency and sustainability of farm management systems
- Assist farmers and growers in developing and implementing business plans
- Advise on or oversee budgets, cashflow and production targets for clients
- Research and report on factors that affect crop production, pasture growth, and animal breeding
- Advise farmers and growers on fertiliser and nutrient use to improve productivity and environmental performance
- Investigate, plan and advise on methods for coping with the effects of pests and diseases and natural disasters such as floods
- Provide advice on compliance with current legislation such as the Resource Management Act
- Prepare property and environmental management reports for clients.

Working conditions
Agricultural/horticultural consultants:
- May work irregular and long hours
- Work in offices and on clients’ farms or orchards
- Work in all weather conditions
- May travel within New Zealand or overseas to attend conferences or visit clients, factories, banks or export marketing firms.

Entry requirements
To become an agricultural/horticultural consultant you usually need a Bachelor’s degree in one of the following:
- Agricultural or horticultural science
- Agribusiness
- Environmental science.
A driver’s licence is usually required.

Personal requirements
Agricultural/horticultural consultants need to be:
- Able to build and maintain relationships with a wide range of people
- Good communicators, with listening and public speaking skills
- Hard-working, friendly, patient and able to inspire confidence
- Good negotiators
- Skilled in analysis and decision making
- Skilled in planning, organising and problem solving
- Able to work under pressure with good time management skills.

What are the chances of getting a job?
Shortage of agricultural/horticultural consultants
Chances of getting a job as an agricultural/horticultural consultant are good due to:
- Growth in the agricultural and horticultural sectors
- More consultants being required to service clients because of growth and change within the sectors
- A shortage of skilled workers
- Increased vacancies because of retirement and promotion.

Demand is likely to increase as farming and orchard systems become more sophisticated and farmers will need independent expert advice from agricultural/horticultural consultants.

Global trends influencing demand for specialist consultants
In the future, jobs in the agricultural and horticultural sectors will be more specialised than before. Reasons for this include:
- Emerging, sophisticated technologies
- A growing market in Asia for products
- Critical issues around food safety, biosecurity, sustainability, the environment and animal welfare.

Therefore, there is high demand for skilled consultants who can provide independent, qualified advice and analysis in these specialist areas:
- Nutrient budgeting and planning
- Farm and orchard environmental plans
- Resource consent applications
- Water quality monitoring and laboratory testing
- Wastewater and effluent testing and application modelling
- Geographic information system (GIS) mapping.

Types of employers varied
Agricultural/horticultural consultants can work for a range of organisations, including:
- Agricultural and/or horticultural consultancy firms
- Government agencies such as Pāmu (Landcorp)
- Iwi and Māori farming businesses
- Large businesses that own, manage or lease orchards or farms
- Rural servicing firms and fertiliser or dairy companies
- Specialist agricultural companies such as those involved in animal breeding or research.

Many agricultural/horticultural consultants are self-employed.

This information is a guide only.
Last updated 30 July 2021
I chose my degree because of its broad range of animal, soil, agronomy and farm management papers.

Becca Bush
Bachelor of Agricultural Science graduate

Agricultural/Horticultural Scientist
Kaiputiaao Ahuwhenua

Agricultural/horticultural scientists study farm animals, soils, pastures and crops to improve growth, health and quality, and to prevent pests and disease.

Pay
Pay for agricultural/horticultural scientists varies depending on qualifications, experience, and the type of work they do.
- Graduates with a doctorate usually earn $65,000 to $75,000 a year.
- After three to five years, agricultural/horticultural scientists usually earn $75,000 to $90,000.
- Senior agricultural/horticultural scientists may earn $80,000 to $150,000.

What you will do
Agricultural/horticultural scientists may do some or all of the following:
- Research and advise on animal or plant diseases, pest control, and chemical use
- Develop better methods of managing farms and orchards
- Study the effects of agriculture and horticulture on the environment
- Oversee new projects and field research
- Research and write reports based on field study, and present results
- Share research findings with other scientists, companies and government agencies
- Write applications for research funding and manage budgets
- Train and supervise lab technicians, research teams and field workers
- Make sure all scientific work meets legal requirements.

Working conditions
Agricultural/horticultural scientists:
- Usually work regular business hours. They may work irregular or longer hours when doing fieldwork and research
- Work in offices, laboratories and glasshouses, and on farms, orchards and nurseries
- May travel locally to talk to farmers and growers, and overseas to attend conferences or work on international research projects.

Entry requirements
To become an agricultural/horticultural scientist, you need a doctorate in science in an area such as:
- Agricultural science
- Microbiology
- Biochemistry
Agricultural/horticultural scientists in research positions usually apply for a postdoctoral fellowship after completing a doctorate.

You may need to do two or three postdoctoral fellowships (usually lasting two or three years each) before getting a permanent scientist position.

Personal requirements
Agricultural/horticultural scientists need to be:
- Accurate
- Observant
- Organised
- Decisive
- Good at solving problems
- Good at communicating
- Practical
- Able to work well alone and in a team.

What are the chances of getting a job?
Good demand for agricultural/horticultural scientists

Chances in these areas are particularly good for agricultural/horticultural scientists with experience in:
- Analysing and monitoring climate and environmental conditions
- Producing research and reports that inform government policy and legislation
- Researching and monitoring sustainable land and water use
- Scientific development, research and innovation projects.

Demand is strongest for scientists who specialise in environmental research.

Types of employers varied
Agricultural/horticultural scientists may work for:
- Agricultural and horticultural equipment suppliers
- Animal and plant feed developers and manufacturers
- Chemical companies producing fertilisers and similar products
- Consultancy companies – for example, those doing environmental assessments for resource consents
- Government departments and local councils
- Universities and research institutes.

Increased funding means more jobs
In the 2019 Budget, the Government announced increased funding for some primary sector areas. As a result, opportunities for agricultural/horticultural scientists are best in:
- Animal welfare
- Biosecurity
- Environment and conservation
- Food safety
- Sustainable land use.

This information is a guide only.
Last updated 6 December 2019
Agricultural/Horticultural Field Representative
Mangai Taiao Awhunewa

Agricultural/horticultural field representatives sell products such as farm equipment, and advise clients on crop and livestock management.

**Pay**
Pay for agricultural/horticultural field representatives varies depending on their position in the company, ability, experience, and incentives or profit-sharing arrangements.
- Cadet or trainee agricultural/horticultural field representatives usually start on about $55,000 a year.
- Agricultural/horticultural field representatives with two to three years’ experience usually earn between $70,000 and $90,000.
- Agricultural/horticultural field representatives with more than three years’ experience can earn from $90,000 to $120,000.

Agricultural/horticultural field representatives with over three years’ experience sometimes earn a base salary plus commission.

**Entry requirements**
There are no specific requirements to become an agricultural/horticultural field representative. However, a diploma or degree in agriculture, horticulture, commerce or farm management is recommended. Knowledge of farm management and farming techniques is an advantage.

A driver’s licence is usually required.

**Personal requirements**
Agricultural/horticultural field representatives need to:
- Have good communication skills, including the ability to relate to a wide range of people
- Be able to build and maintain relationships
- Be hard-working, friendly, patient and able to inspire confidence
- Be good negotiators
- Be accurate and able to use good judgement
- Have good planning, organisational and problem-solving skills
- Have record-keeping skills.

**What are the chances of getting a job?**
Good chances of getting a job.

Opportunities for agricultural/horticultural field representatives come up regularly because:
- The agricultural and horticultural sectors are growing
- More representatives being required to service clients
- Vacancies arise due to staff resignations, retirements and promotions.

Experienced agricultural/horticultural field representatives are in high demand and are often offered jobs by rival companies looking to expand their business.

**Agricultural/horticultural field representative jobs not always advertised**
Agricultural/horticultural field representative vacancies are not always advertised, as most companies fill roles through internal promotions or by agriculture or horticulture graduates approaching them directly.
Most nationwide companies operate a trainee programme for new entrants or graduates.

**Working conditions**
Agricultural/horticultural field representatives usually work:
- Experiencing conditions
- Work on farms and in offices
- Harvest seasons
- Usually work a 40-hour week but during peak seasons may work longer hours, including weekends
- Work outdoors, in glasshouses, nurseries, packhouses or offices
- Work in all weather conditions, with machinery and chemicals that can be dangerous
- May have to travel locally between crop fields and to markets or suppliers.

**Pay**
Pay for crop farmers/managers varies depending on:
- Farm size
- Crop type
- Farm profitability, which may vary from season to season
- Prices received for the crops

Crop farmers/managers with up to five years’ experience usually earn between $55,000 and $110,000 a year.
Crop farmers/managers who work for large organisations can earn between $120,000 and $180,000.

**Entry requirements**
Crop farmers/managers need to be:
- Good administrators, with business planning skills
- Good communicators and managers
- Able to work well in a team and under pressure.

**What are the chances of getting a job?**
High demand for crop farmers/managers.

Demand for crop farmers/managers is increasing as the horticulture industry continues to grow.
Crop farmers/managers are particularly in demand because:
- There are not enough New Zealanders available to do the work
- The horticulture industry is expected to grow and increase its export revenue to over $5 billion in 2023
- Farms are getting larger and more complex, and require advanced soil and crop management skills to achieve greater productivity.

**Crop Farmer/Manager**
Kaihuwhenua Huangkanakai/Kaiwhakahaere Huangkanakai

Crop farmers/managers plan and manage plant production on farms and in vineyards and hothouses.

**Pay**
Pay for crop farmers/managers is as follows:
- Graduate
  - $55,000–$90,000
- Senior
  - $90,000–$120,000

**Working conditions**
Crop farmers/managers:
- Usually work between eight and ten hours a day, but during peak seasons may work longer hours, including weekends
- Work outdoors, in glasshouses, nurseries, packhouses or offices
- Work in all weather conditions, with machinery and chemicals that can be dangerous
- May have to travel locally between crop fields and to markets or suppliers.

**Entry requirements**
Crop farmers/managers need to be:
- Good administrators, with business planning skills
- Good communicators and managers
- Able to work well in a team and under pressure.

**What are the chances of getting a job?**
Good due to strong demand.

**Crop production/agronomist manager**
Crop production/agronomist managers manage and summarise the work of a range of technical staff, process the results of the work, and ensure that the data is correct and of high quality.

**Pay**
Pay for crop production/agronomist managers is as follows:
- Graduate
  - $55,000–$90,000
- Senior
  - $90,000–$120,000

**Working conditions**
Crop production/agronomist managers:
- Usually work between eight and ten hours a day, but during peak seasons may work longer hours, including weekends
- Work outdoors, in glasshouses, nurseries, packhouses or offices
- Work in all weather conditions, with machinery and chemicals that can be dangerous
- May have to travel locally between crop fields and to markets or suppliers.

**Entry requirements**
Crop production/agronomist managers need to be:
- Good administrators, with business planning skills
- Good communicators and managers
- Able to work well in a team and under pressure.

**What are the chances of getting a job?**
Good due to strong demand.
Orchard Farmer/Manager
Kaipamū Uru Hua Rakau/Kaiwhakahaere Uru Hua Rakau
Orchard farmers/managers plan and manage fruit and nut production in orchards.

What you will do
Orchard farmers/managers plan and manage fruit and nut production in orchards. They ensure trees and shrubs are watered, fertilised and pruned, and that irrigation and frost protection is in place. They may have to travel between orchards and to markets or suppliers.

Extra requirements for chemical spraying
If your job requires agricultural spraying you need a certificate from approved providers such as GrowSafe.

Personal requirements
Orchard farmers/managers need to be:
- Good administrators, with business planning skills.
- Good communicators and managers.
- Able to work well in a team and under pressure.

What are the chances of getting a job?
Growing demand for orchard farmers/managers
Demand for orchard farmers/managers is increasing as the horticulture industry continues to grow. Orchard farmers/managers are particularly in demand because:
- There are not enough New Zealanders available to do the work.
- The horticulture industry is expected to grow and increase its export revenue to over $5 billion in 2023.

Working conditions
Orchard farmers/managers:
- Usually work between eight and 10 hours a day, but during peak seasonal harvest and planting times may work longer hours, including weekends.
- Work outdoors or in packhouses and offices.
- Work in all weather conditions, with machinery and chemicals that can be dangerous.
- Have to travel between orchards and to markets or suppliers.

Entry requirements
Details of entry requirements will vary depending on:
- Orchard size
- Orchard profitability, which may vary from season to season
- Prices received for the fruit or nuts
- Orchard farmers/managers with up to five years’ experience usually earn between $55,000 and $110,000 a year.
- Orchard farmers/managers who work for large organisations can earn between $120,000 and $180,000.

Pay
Pay for orchard farmers/managers varies depending on:
- Orchard size
- Orchard profitability, which may vary from season to season
- Prices received for the fruit or nuts
- Orchard farmers/managers with up to five years’ experience usually earn between $55,000 and $110,000 a year.
- Orchard farmers/managers who work for large organisations can earn between $120,000 and $180,000.

Winemaker
Kaihanga Waina
Winemakers make wine from grapes and other fruit.

What you will do
Winemakers may do some or all of the following:
- Use software to track grape health and vineyard yields.
- Record procedures, blends and specifications are met, such as alcohol level requirements in New Zealand or the country of export.
- Filter, bottle and package the wine for sale.
- Review winemaking equipment and machinery.
- Manage winery workers.
- Use software to track grape health and vineyard yields.
- Record procedures, blends and inventories.
- Market and sell wine.

Working conditions
Winemakers:
- Usually work a 40-hour week, but during harvest will often work up to 100 hours a week.
- Work in a winery, winery laboratory, office or factory.
- May also work outdoors in vineyards.

Entry requirements
There are no specific requirements to become a winemaker. However, employers often prefer to have a qualification such as a:
- Graduate Diploma in Viticulture or Oenology.
- Bachelor of Viticulture and Winemaking.

Personal requirements
Winemakers need to have:
- Good communication skills.
- An eye for detail.
- Ability to problem solve and work under pressure.
- Practical and creative skills.
- Business, management and marketing skills.

What are the chances of getting a job?
Number of winemakers expected to grow
New Zealand wine has an excellent reputation, attracting tourists and creating export demand. The export value of wine has risen each year for the last decade and will likely reach $2 billion annually by 2020. The number of wineries is increasing.

Shortage of skilled winemakers
Employers report difficulty finding skilled winemakers, so your chances of securing a job are best if you have relevant experience.

Winemaker appears on Immigration New Zealand’s regional skill shortage list. This means the Government is actively encouraging skilled winemakers from overseas to work in New Zealand.

Chances better in larger wine-producing regions
It can be hard to get an entry-level position or to progress from an assistant winemaker role. However, chances for entry-level roles are better in larger wine regions such as Marlborough, Central Otago and Hawke’s Bay.

Most winemakers work for wineries or wine companies
Winemakers generally work for wineries or wine companies. They can work for small wineries, which make up 80% of New Zealand’s total wine producers, or for large corporate producers.

Pay
Pay for winemakers varies depending on experience, the type of work they do and the size of the winery and its region.
- Unqualified cellar hands usually earn from $42,000 to $46,000 a year.
- Qualified cellar hands usually earn from $42,000 to $52,000.
- Assistant winemakers usually earn from $60,000 to $83,000.
- Winemakers can earn between $89,000 and $136,000.
- Chief winemakers, who manage teams of winemakers, can earn between $144,000 and $211,000.
- Winemakers who buy into wineries or wine companies that may own one or more wineries.

Working conditions
Winemakers:
- Usually work a 40-hour week, but during harvest will often work up to 100 hours a week.
- Work in a winery, winery laboratory, office or factory.
- May also work outdoors in vineyards.

Entry requirements
There are no specific requirements to become a winemaker. However, employers often prefer to have a qualification such as a:
- Graduate Diploma in Viticulture or Oenology.
- Bachelor of Viticulture and Winemaking.

Personal requirements
Winemakers need to have:
- Good communication skills.
- An eye for detail.
- Ability to problem solve and work under pressure.
- Practical and creative skills.
- Business, management and marketing skills.

What are the chances of getting a job?
Number of winemakers expected to grow
New Zealand wine has an excellent reputation, attracting tourists and creating export demand. The export value of wine has risen each year for the last decade and will likely reach $2 billion annually by 2020. The number of wineries is increasing.

From 2018 to 2019, 19 new wineries were established.

Due to industry growth, the number of winemakers is expected to increase by 3% each year until 2026.

Growing careers

At Lincoln, growing the future is what we're all about. Meet some of our past students, who are well on their way to achieving their dreams.

Kylie Lyders
South Otago, NZ
Bachelor of Agricultural Science

Kylie Lyders was born to study at Lincoln. Growing up on a sheep and beef farm in South Otago and hailing from a close rural community, she had always wanted to come to a small, friendly campus.

“I met so many amazing people at Lincoln,” she says. “It’s like a big family and we had a really good year group. I will always value the friendships I made there.”

Kylie’s farming background made our flagship Bachelor of Agricultural Science the ideal programme for her.

Now working in rural banking at ASB Bank, she also has ambitions to become an agricultural rep and help farmers to achieve their goals.

“But eventually, I see myself going back to the family farm,” she says.

She found Lincoln’s field trips especially beneficial in terms of growing her knowledge and she enjoyed lab work in the areas of animal, plant and soil sciences.

“I'm a hands-on person, so practical work gave me a better understanding of the course content.”

She loved the extracurricular activities arranged by the Lincoln University Students’ Association and helped out with Handy Landys – a group of students in the Canterbury area who give back to the rural community during times of stress and hardship.

“It was super fun and nice to be able to volunteer and help farmers and others around the community,” she says.

When Kylie’s not indulging her passion for farming, she’s showcasing her athletic prowess on the world stage. As a talented aerobic gymnast, she has previously represented New Zealand at the FISAF World Championships in the Netherlands.

“As a Lincoln student, I often worked with the sports scholarship trainers at the LU Gym. They were really helpful and had a massive influence on my sport.”

Kylie has high praise for Lincoln lecturers, who she describes as “really understanding and caring”.

“They were always open to helping out when my sport clashed with my university work and were happy to juggle things to fit in with sporting trips if I was going to be away.”

A student journey

Kylie says Lincoln helped her to grow by providing numerous opportunities.

I was exposed to so many different things that put me out of my comfort zone and allowed me to showcase my strengths.
Graduate pathways

Laura Keenan
Bachelor of Agricultural Science (First Class Honours)
Director, KS Agri

After graduating with a Bachelor of Agricultural Science (First Class Honours), Laura Keenan moved straight into a position as a Farm Environmental Consultant at a soil consultancy company that services the South Island. She worked there for three years, helping farmers to comply with their environmental plans and nutrient budgets.

Partly due to the strong networks she developed at Lincoln, she was then headhunted for a role as an agronomist with Agricom, a position that involved recommending seeds, plants, grass and crops for specific businesses.

Laura says her Lincoln degree thoroughly prepared her for these roles. “I found the agricultural and agribusiness courses really enjoyable and relevant to a future career. The research facilities are excellent as well. Completing a dissertation and research project also allowed me to grasp all elements of academic research and its importance in New Zealand agriculture.”

Now further on in her career, Laura has returned to Lincoln to do her PhD in Hill Country Futures.

Laura says the interactions she had with her lecturers proved particularly helpful.

The lecturers were definitely an integral part of my success at Lincoln, as they were more than happy to elaborate and spend their own valuable time to ensure my understanding was correct.

Kelsi Gough
Bachelor of Agricultural Science (First Class Honours)
Area Manager, FMG

Lincoln’s excellent reputation in the agricultural sector was a major reason why Kelsi Gough chose to study at the university. However, her decision was cemented when she heard a number of former students reminiscing fondly about their Lincoln days.

“This is what tipped the scales in favour of attending Lincoln over other universities offering similar courses,” she says.

After graduating with a Bachelor of Agricultural Science (First Class Honours) Kelsi accepted a role in the graduate programme for FMG, which she describes as New Zealand’s leading insurer.

“As there aren’t many prerequisites in the Agricultural Science degree, the direction you take is really up to you. During my four-year programme, I studied a diverse range of subjects, including soil, animal and plant sciences, farm management, law, economics and rural valuation.”

Kelsi Gough
Bachelor of Agricultural Science (First Class Honours)
Area Manager, FMG

Len Ibbotson
Bachelor of Viticulture and Oenology
Technical Services Lead (Horticulture), Syngenta Australia and New Zealand

Len Ibbotson, originally from Hawke’s Bay, chose to study for a Bachelor of Viticulture and Oenology as the programme of study offered him the exact training he was looking for.

“Studying at Lincoln offered a good opportunity to travel to the South Island, which I wanted to do. It also made sense to study plants at a university with a strong land-based history,” he says.

Len says the most valuable aspect of his study was the balance between plant and wine science, and the practical wine and grape management tools he received.

“Studying at Lincoln offered invaluable preparation for my future career. I have found that my degree is highly relevant to the wine-growing industry and provides sound theoretical knowledge, which enables recruitment and development,” he says.

Len still keeps in touch with staff and friends from Lincoln and says he loved meeting many interesting people on campus.
Many of our programmes have a practical work component. It’s considered a crucial aspect of study for some courses and offers experiences in a broad range of relevant careers. You’ll normally carry out practical work during summer breaks and it will be closely linked to the lecture material in your study programme. While it’s your responsibility to find practical work placements, the Practical Work Coordinator can help by putting you in touch with employers who are already connected with us. You’re strongly encouraged to seek out a diverse range of practical work opportunities.

Why practical work?
Practical work will:
• Complement your studies and enhance the marketability of your qualification
• Give you a chance to experience new learning environments
• Expose you to the appropriate industry environment, including its technical, economic and social environments
• Teach you to perform a range of tasks specific to the industry environment including skills in observation, information gathering, data analysis, and report writing
• Equip you with more knowledge of industry employment opportunities.

I’m a hands-on person, so practical work gives me a better understanding of the course content.
Kylie Lyders
Bachelor of Agricultural Science

For more information, please contact the Practical Work Coordinator at practicalwork@lincoln.ac.nz or +64 3 423 0081. Ask for a practical work handbook.
Key Dates and Events

Here are some of the events you won’t want to miss as you consider your Lincoln journey.

Information Evenings
A chance to chat with academics from our areas of specialisation, network with existing students and find out more about accommodation, scholarships and student wellbeing and experience in a relaxed atmosphere in a city venue with nibbles and beverages.

Hui Whakatuwhera Open Day
A whole day when you can tour our campus and learn why Lincoln University is such a great place to study with subject presentations and lecturers and students available to answer all of your questions.

Scholarship applications
We have hundreds of scholarships available, but Lincoln scholarships like Future Leader and Sports Scholarships close in August. You can check them all out on our website; see if you meet the criteria; and find out all the closing dates.

Enrolments
Enrolments open in October but you can apply anytime. Once we have offered you a place and you have accepted then you can begin your enrolment.

Halls application start/finish and moving in
Do you want to live on campus and get the full "Lincoln experience"? Halls applications open in October and move in is in February.

Rā Whakawhanaukataka - Orientation Day
Rā Whakawhanaukataka-Orientation Day brings together our new students to celebrate the start of their Lincoln University journey.

You will meet other students, learn what it means to belong to the Lincoln whānau and find out what to expect in your first lectures.

Preparation Week
Preparation Week is the perfect time for new and existing students to get assistance with completing to-do lists (including enrolment) and find your way around campus before the start of lectures.

Semester dates
Semester 1 starts in February and Semester 2 in July, and you can start your study in either (as long as your course or programme is offered then), as well as Summer School which starts in November and again in January.

Make sure you go to www.lincoln.ac.nz/key-dates for more info and the exact dates these exciting events take place.
Apply and enrol
