Lincoln University
Areas of Specialisation

Science
Lincoln University is proud to help grow your future.

As the longest running agriculturally based university in the Southern Hemisphere, Lincoln’s story begins with farming but it certainly doesn’t end there. As New Zealand’s economy has diversified so have we. What we are interested in growing is people.

Now more than ever, we are enabling our students to grow to meet urgent industry demands in areas such as food, fibre, sustainability, agribusiness and more.

At Lincoln, we offer great learning and growth through powerful applied research, deep industry collaborations, global connections and world-class learning environments and teaching.

Lincoln University is proud to help grow your future. As the longest running agriculturally based university in the Southern Hemisphere, Lincoln’s story begins with farming but it certainly doesn’t end there. As New Zealand’s economy has diversified so have we. What we are interested in growing is people.

Now more than ever, we are enabling our students to grow to meet urgent industry demands in areas such as food, fibre, sustainability, agribusiness and more.

At Lincoln, we offer great learning and growth through powerful applied research, deep industry collaborations, global connections and world-class learning environments and teaching.

As a Lincoln graduate you'll arrive at your career globally connected, forward thinking and ready to shape tomorrow.

Lincoln is a safe haven that will offer you a wealth of opportunities to develop leading-edge skills here and in the real world. Just as importantly, you will become part of a thriving and inclusive student community, forging friendships that will last a lifetime.

We truly look forward to helping you grow.

It’s true for industry, agriculture and it’s most certainly true for people. At Lincoln University, helping you grow is what we are all about.

And we encourage you to do it your way, with diverse learning that fits your ambitions in an environment that allows you to flourish.

We partner you with industry to prepare you for the real world and to plant the seeds of a rewarding future.

So when the time comes, you’re ready to go out there and grow the future for yourself and others.

Welcome to Lincoln University. A place to grow.
Lincoln and the Canterbury region

Welcome to Canterbury
Our campus is located in the Lincoln township, a thriving village on the Canterbury plains. Lincoln is small and very friendly. It boasts local pubs, great cafés and eateries, shops and even its own farmers and craft market.

Twenty minutes away is Ōtautahi Christchurch, which is transforming itself into one of the world’s most sustainable cities. Its rapidly evolving culture and energy makes it ideal for students.

And no more than a couple of hours from Ōtautahi Christchurch, Canterbury offers a huge range of exciting recreational options in areas of incredible natural beauty – you can bungy jump, hike, mountain bike, raft, surf, swim, play golf, shop, visit wineries and gardens, and so much more.

Choosing Lincoln University
At Lincoln, we’ve got a solid reputation for offering the finest, most industry-relevant learning programmes. And we’d like to make you a part of that.

As New Zealand’s leading land-based university, our specialised subject areas are all about harnessing the value of the land to help make the world a better place.

We’ve got strong industry ties to ensure that your learning lines up with what businesses need. Loads of our students gain work experience while they study, picking up real skills for the real world.

You can’t put a price on that. We’re the smallest university in New Zealand, which means a more personal learning environment, extra face time with lecturers and a friendly, village atmosphere.

Māori and Pasifika
Lincoln University is a great place for Māori and Pasifika students to gain an excellent qualification in a fun, friendly and supportive environment.

We offer a values based programme of manaaki (support) for Māori students called Manaki Taura that offers academic support, internships and practical work opportunities.

We’re also committed to helping to develop the next generation of Māori and Pasifika leaders by offering industry-relevant, career-oriented programmes with support from Te Manutaki - the Māori and Pasifika Team.

International students
Our students hail from around 80 different countries throughout the world. This makes Lincoln University a truly global network and a diverse, exciting place to be.

We hope you will join us soon.

Why Lincoln University?
At Lincoln University, we love our green and vibrant village full of like-minded people. There’s always something to get involved in and the vibe is super friendly. Here are just a few of the things available to you as a Lincoln student.

Join the club.
Looking for great ways to meet new people, broaden your horizons and have some fun? Join a club. The Lincoln University Students’ Association (LUSA) and the Whare Hākinakina LU Gym oversee all of our clubs and organisations. We can fill you in on what’s out there or even help you set up your own club.

Help is here.
Every student needs a little help now and then. That’s why we have support services for every area of student life. And they’re there for you whenever you need them. Whether it’s budgeting advice, help with a physical or mental health problem or you just want someone friendly to talk to, we’re on your side.

LUSA. They’re for you.
The good people at the Lincoln University Students’ Association are all about making student life the best it can be. Independent from the university, they offer impartial advice and look after your student rights. LUSA is committed to the Treaty of Waitangi and they help represent our Māori students at Lincoln. They also organise awesome and affordable events from lunchtime sausage sizzles to the legendary end-of-year Lincoln University Garden Party.

Lincoln University's areas of specialisation

Our nine areas of specialisation are designed to help you tailor your learning to your ambitions. Each area contains a range of practical study programmes that you can mix and match to gain the breadth of knowledge and expertise needed for success in your chosen field.

Lincoln University areas of specialisation

Agriculture, Horticulture and Viticulture
Business
Environment
Food, Wine & Beer
Landscape Architecture
Property & Valuation
Science
Sport & Recreation
Tourism

The purpose of this booklet

Our science programmes will prepare you to play a part in meeting the major demand for university graduates in some of the world’s most enduring professions. This booklet outlines the qualifications within the specialisation and explores potential career outcomes, as well as providing valuable information on how to get where you want to be.

We cover pathways our graduates have taken, offer insights into the journeys of some of our current students, and throw some real-world facts into the mix.

Ultimately, this book will assist you in making the right choice to grow your future.

To view the full range of qualifications on offer, visit: www.lincoln.ac.nz

Our science programmes will prepare you to contribute to the sustainable management of land, water, air and the country’s abundant natural resources.

There’s a lot of demand for Lincoln science graduates in many industries, particularly areas such as agriculture, food science, environment and conservation.

Across all science disciplines, we use real-world examples and practical experiences to give you the skills to make an immediate difference in your chosen field.

Hands-on learning opportunities with leading scientists and industry professionals will get you a foot in the door as far as career options are concerned and the skills we teach are attractive to many employers.

Our strong research presence offers a broad world view of how science can be used to solve real problems, while our course content is highly focused, providing both theoretical and practical knowledge.

As our world changes, we need highly skilled individuals who can tackle the big issues. How do we create healthy foods from new ingredients that meet consumer expectations for sustainability? How do we protect our environment from biological threats? How do we maintain good environmental quality?

We are working hard to address these problems and as a Lincoln Bachelor of Science graduate, you can join us in our mission.

Qualifications

Diploma in Applied Science
Bachelor of Agricultural Science
Bachelor of Science, Conservation and Ecology major
Bachelor of Science, Environmental Science major
Bachelor of Science, Brewing and Fermentation major
Bachelor of Science, Food Science major
Bachelor of Science, Individual major
Bachelor of Agricultural Science with Honours
Bachelor of Science with Honours
Graduate Certificate in Applied Science
Graduate Diploma in Applied Science
Graduate Diploma in Brewing and Fermentation
Graduate Diploma in Viticulture and Oenology
Postgraduate Certificate in Applied Science
Postgraduate Diploma in Agricultural Science
Postgraduate Diploma in Applied Science
Master of Agricultural Science
Master of Pest Management
Master of Science
Master of Science in Food Innovation
Master of Wine & Viticulture
PhD
Bachelor of Agricultural Science

This qualification has produced some of the best leaders, thinkers and doers in the agricultural sector for over 140 years. Plus, if you really want to set yourself apart from the herd, you can undertake an original research project on a chosen topic in animal science, plant science, soil science or farm management to complete your degree with honours.

Key features

- Gain in-depth knowledge of animal, plant and soil sciences
- Learn how primary industry, agricultural, and plant production systems work
- Undertake practical work on a farm or in an allied industry of your choice
- Use data from farms to investigate ways to improve feed and nutrient management.

Career opportunities

With a Bachelor of Agricultural Science from Lincoln University, you’ll be an ideal candidate for a rewarding career in areas like consultancy, research, technical roles and farm management.

Entry requirements

University Entrance through NCEA, or an approved equivalent qualification
- If English is not your first language other entry requirements will apply. Learn more about English language requirements here: www.lincoln.ac.nz/english-requirements

Recommended preparation

- Agriculture/Horticulture
- Biology*
- Chemistry*
- Computing
- English*
- Māori Studies
- Maths/Statistics*

*Highly recommended subjects

Intake semesters

You can start in either:
- Semester 1 (late February)
- Semester 2 (mid July)*

There are also options for starting in summer semesters, although the range of courses available would be limited.

Additional major

There may be an opportunity to add an additional major to your programme of study. Please refer to the programme course advisor for further information.

Practical work

During your degree, you’ll need to complete 28 weeks of paid full-time practical work. This can include:
- Working on one dairy farm for 10-14 weeks
- Working on a sheep or beef farm for 10-14 weeks
- Using any remaining time to work on a different type of farm or in an allied industry of your choice.

Previous farming experience is preferred but not essential.

To pass the practical work component, you’ll need to demonstrate:
- Competence in driving vehicles (previous experience driving tractors or trucks would be an advantage)
- A physical aptitude for working on farms without endangering yourself or others.

For more information, please email the Practical Work Coordinator at practicalwork@lincoln.ac.nz or phone +64 3 423 0061.

I chose my degree because of its broad range of animal, soil, agronomy and farm management papers. I was able to choose topics which I was passionate about and customise my degree.

Bachelor of Science (Brewing and Fermentation)

Craft your career in brewing. Gain sought after skills from this science-based programme covering brewing beer and fermenting a wide range of products such as cheese, kombucha, cider, yogurt, kimchi, and kefir.

The brewing and fermentation industries hold key positions in our food sector. They make a wide range of high-quality goods utilising the produce of the land-based sectors. This degree major will make you highly employable in the brewing and fermentation industries around the world. You will work alongside industry partners to develop a particular style of beer or fermented product, develop valuable hands-on skills, gain experience and learn production principles, and to be able to step into a brewing or fermentation role in industry, or in your own business.

Key features
- Gain knowledge of the science and technology that underpin, maintain and enhance the quality of fermented products and be able to innovate new high-quality products
- Achieve a high level of technical skills and competence
- Gain an awareness of the whole value chain of brewed and fermented products
- Learn the skills and values to apply these attributes within the food and beverage production industries.

Career opportunities
Graduates in this Lincoln degree will have the opportunity to develop a meaningful, fulfilling career in areas such brewing, production of fermented foods and beverages including cider, kombucha, cheese, yogurt, kimchi, and kefir, in almost any country.

Bachelor of Science (Conservation and Ecology)

As our world changes, we need highly skilled conservation and ecology specialists to help protect our environment and tackle the big questions. If you think you could be the answer, step this way.

This degree is designed to produce graduates with a firm grounding in all of the appropriate sciences. It focuses on giving you practical skills, experience, and industry connections to contribute to the ecological and conservation activities of government and private agencies in New Zealand and beyond.

Plus, Lincoln is right at the cutting edge in this new era of research so you can be sure you’re gaining the most relevant knowledge.

Career opportunities

Key features
• Gain the scientific understanding to help address major conservation issues
• Receive a solid grounding in the biological sciences – biology, ecology, geology, plant and animal sciences
• Participate in hands-on field trips and laboratories to consolidate your learning from weekly lectures
• Be taught by world-class scientists who are spearheading research into conservation and ecology.

Recommended preparation
• Biology*
• Chemistry

Bachelor of Science (Environmental Science)

The exploding human population is placing extreme pressure on the planet. The world needs skilled scientists to address the degradation of freshwater and productive land through overuse and pollution, loss of biodiversity and the climate emergency. Lincoln University’s unique focus on land-based resources makes it the only place to prepare you for the most important work on Earth today!

The degree is designed to give you a firm grounding in all of the appropriate sciences relating to the natural environment and our effects on it. You will learn about natural processes in soil and water and understand the effects of land use, with the aim of protecting and restoring the environment for future generations.

Key features
• Gain the scientific understanding to help address major issues such as climate change, intensive land and water use driven by rapidly-growing populations and industrialisation of developing countries
• Have practical experience with the land and water issues you will face in the future, either in New Zealand or overseas
• Be taught by world-class scientists who are spearheading research into sustainable land use
• Play a central role in ensuring sustainability in Canterbury and beyond.

Recommended preparation
• Biology*
• Chemistry*
• Physics
• English
• Geography/Social Studies
• Māori Studies
• Maths/Statistics*

Bachelor of Viticulture and Oenology

Behind every great wine there’s a lot of high quality science and sound management. This specialist degree will prepare you for a rewarding career in a fascinating industry.

This degree covers wine preparation, advanced viticulture and wine science, pest and disease management, biometrics and wine chemistry. Our graduates are highly sought-after and if you’re one of them, you can look forward to great career opportunities all over the world.

Key features
• Receive a solid grounding in the sciences, including biology, chemistry, and plant, soil and wine science
• Enjoy the opportunity to produce your own wine
• Discover the essentials of horticultural systems
• Learn the principles of wine science and wine quality assessment
• Develop an understanding of the wine supply chain from plant and soil sciences through to marketing and management of wine products

Career opportunities
Employment options in the wine industry are many and varied. You could become a Viticulturist, Winemaker, Vineyard Manager, Cellar Manager, Winery Lab Manager, Marketing Manager or Sales Representative.

Entry requirements
University Entrance through NCEA, or an approved equivalent qualification
• If English is not your first language, other entry requirements will apply. Learn more about English language requirements here: www.lincoln.ac.nz/english-requirements

Recommended preparation
• Agriculture/Horticulture
• Biology*
• Chemistry*
• Computing
• English*
• Māori Studies
• Maths/Statistics
*Highly recommended subjects

Intake semesters
You can start in either:
• Semester 1 (late February)
• Semester 2 (mid July)*
There are also options for starting in summer semesters, although the range of courses available would be limited.
*Please obtain course advice if you are thinking about this option.

Additional major
There may be an opportunity to add an additional major to your programme of study. Please refer to the programme course advisor for further information.

Practical work
You’ll need to complete 18 weeks of practical work during your degree. This must include a minimum of 6 consecutive weeks in both:
• A commercial vineyard
• A commercial winery.
In addition to this, you can complete 6 weeks practical work in an allied industry such as wine bar or shop, winery laboratory or brewery. Alternatively, you can complete up to 12 weeks in your vineyard or winery practical work placement.
For more information, please email the Practical Work Coordinator at practicalwork@lincoln.ac.nz or phone +64 3 423 0061.

Additional majors

Studying for a bachelor’s degree? You can include an additional major, which will supplement your degree programme with meaningful study in a complementary discipline.

Accounting
Develop the accounting-based knowledge and skills to pursue a wide range of business careers. This major will massively increase your employability, especially when coupled with a business major. Learn to evaluate accounting issues in a business environment, use the latest tools and techniques to solve accounting problems and plan and analyse accounting and finance reports.

Courses
The Accounting major consists of eight courses: one 100-level course, four 200-level courses and three 300-level courses. Courses selected at the 300-level for the major cannot be applied to any other qualification.

Economics
Use economics to solve real-world problems and gain the expertise to help address a range of global issues. You’ll develop the ability to quantitatively analyse New Zealand value chains (from primary production to end consumers), a skill that is highly sought after by employers.

Courses
The Economics major consists of eight courses: two 100-level courses, three 200-level courses and three 300-level courses. Courses selected at the 300-level for the major cannot be applied to any other qualification.

Environmental Management
This major is strongly aligned with Agriculture, Environmental Science, Tourism Management, Land and Property Management, Landscape Architecture and Recreation Management. If you’re studying for one of these degrees, this major will provide you with essential environmental management skills, leading to employment in the profession.

The public and political interest in environmental issues across a broad range of industries, along with increased media coverage, is likely to increase the importance of the environment in employers’ minds and create more careers for people with environmental management skills.

Courses
This major consists of eight courses, which is one-third of a 24-course degree. At least three of the courses are at the 300-level and no more than three can be taken at the 100-level. Courses selected at the 300-level cannot be applied to any other qualification.

Event Management
Gain the expertise to pursue a career as an event professional in a range of industries. Event management is a growing area of specialisation at tertiary institutions throughout Australasia and the world. The significance of events has spread beyond the traditional realm of tourism, sport and the arts into the corporate world and a range of other sectors, including hospitality and wine and food production. Corporations, organisations and local councils appreciate the value that events and festivals bring to businesses and local economies as they help to facilitate their role in encouraging community development and engagement.

Courses
The Event Management major consists of eight courses: three 100-level courses, two 200-level courses and three 300-level courses. Courses selected at the 300-level for the major cannot be applied to any other qualification.

Global Business
Learn the management techniques required to run global organisations. Develop leadership and strategy skills and have the option of specialising in international marketing, international economics, or business sustainability management. An emphasis on internationalisation of management, as well as management functions in multinational corporations, will offer employment opportunities all over the world.

Courses
The Global Business major consists of eight courses: two 100-level courses, three 200-level courses and three 300-level courses. Courses selected at the 300-level for the major cannot be applied to any other qualification.

Finance
Finance lies at the heart of business operations and is a dynamic field within the modern global economy. Develop the advanced knowledge and skills to become a finance expert so that when you join the workforce, you can effectively adapt to a rapidly changing business environment. As New Zealand becomes more dependent on global value chains, greater numbers of university graduates will be required in many industries.

Courses
The Finance major consists of eight courses: three 100-level courses, two 200-level courses and three 300-level courses. Courses selected at the 300-level for the major cannot be applied to any other qualification.

Global Business
Learn the management techniques required to run global organisations. Develop leadership and strategy skills and have the option of specialising in international marketing, international economics, or business sustainability management. An emphasis on internationalisation of management, as well as management functions in multinational corporations, will offer employment opportunities all over the world.

Courses
The Global Business major consists of eight courses: two 100-level courses, three 200-level courses and three 300-level courses. Courses selected at the 300-level for the major cannot be applied to any other qualification.

Event Management
Gain the expertise to pursue a career as an event professional in a range of industries. Event management is a growing area of specialisation at tertiary institutions throughout Australasia and the world. The significance of events has spread beyond the traditional realm of tourism, sport and the arts into the corporate world and a range of other sectors, including hospitality and wine and food production. Corporations, organisations and local councils appreciate the value that events and festivals bring to businesses and local economies as they help to facilitate their role in encouraging community development and engagement.

Courses
The Event Management major consists of eight courses: three 100-level courses, two 200-level courses and three 300-level courses. Courses selected at the 300-level for the major cannot be applied to any other qualification.

Marketing
Develop the expertise to make the right marketing decisions for businesses, consumers, society and the environment. Become aware of the profession’s social, ethical, moral and legal standards and their impact on society. You’ll learn the concepts and tools to be a productive and responsible marketing professional.

Courses
The Marketing major consists of seven courses: two 100-level courses, two 200-level courses and three 300-level courses. Courses selected at the 300-level for the major cannot be applied to any other qualification.

Parks and Outdoor Recreation
The major in Parks and Outdoor Recreation is a multidisciplinary programme bringing together areas of social and ecological science to give a holistic approach to this field of study, equipping students for public and private sector roles in parks and reserves management, visitor services, recreation policy and planning or nature-based tourism.

Courses
This major consists of eight courses, which is one-third of a 24-course degree. Courses selected at the 300-level cannot be applied to any other qualification.

DOC Scholarship
The Department of Conservation (DOC) is offering a number of $5,000 scholarships to talented Lincoln bachelor's degree students undertaking this major. DOC is looking for qualified individuals who can think and plan strategically for tourism on a landscape scale. DOC is also interested in graduates with multi-disciplinary skills in general management, working with iwi, whānau and hapū, visitor and facilities management and partnering skills to help DOC work with others to grow conservation. For more information and application details, visit lincoln.ac.nz/scholarships.

Supply Chain Management
New Zealand is becoming more dependent on long, complex and vulnerable global supply chains for both inputs and exports. Gain a solid grounding in sustainable supply chain practices and the legal framework of global business and prepare to work in supply chain managerial roles within any land-based, manufacturing or service industry. Supply chain management is taught from a systems perspective, to add value to producers, distributors and consumers.

Courses
The Supply Chain Management major consists of eight courses, which is one-third of a 24-course degree. Courses selected at the 300-level cannot be applied to any other qualification.

Tourism Management
A knowledge of tourism adds an extra level of expertise if you would like to work in a range of organisations charged with protecting the physical environment. To be more effective, planners, designers and developers need to understand the behaviour of tourists. Understanding the commercial differences of tourism compared with other sectors of the economy will be invaluable if you’re studying for a business degree.

Courses
The Tourism Management major consists of eight courses from the Bachelor of Tourism Management (75 credits). In addition, there are a number of ‘soft core’ options (30 credits). Courses selected at the 300-level cannot be applied to any other qualification.

Water Management
Water management is a particular challenge for New Zealand, given that the nation’s primary and tourism sectors are underpinned by high-quality fresh water and ecologically sustainable waterways. Yet water resources are diminishing in quality and water is over-allocated in many sub-regions. Develop the water management knowledge and skills to enter a career in the water, land or environmental management sector.

Courses
The Water Management major consists of eight courses, which is one-third of a 24-course degree. Courses selected at the 300-level cannot be applied to any other qualification.
Choose an additional major

If you’re studying for a Lincoln University bachelor’s degree, you may be able to include an additional major, which will add depth to your qualification. Please speak to your course advisor to ensure you pick up the right courses for you.

This table will help you to work out which additional majors you can study within your chosen degree.

Missed out on University Entrance?

Look no further than our Certificate and Diploma in University Studies, which will lead you into a bachelor’s degree programme.

The Certificate in University Studies (CUS) provides language, writing and study skills, along with concepts relating to communication and technology, mathematics, economics and environment. It can be completed fully online through new enhanced virtual courses.

Once you have successfully completed the certificate, you can transfer to the Diploma in University Studies (DUS).

The diploma takes you from a pre-degree stage to entry into the second year of a bachelor’s degree. Depending on your entry qualifications, you can complete it in two or three semesters.

You’ll develop your academic skills and study a range of courses from our bachelor’s programmes.

For more information visit www.lincoln.ac.nz/cus and www.lincoln.ac.nz/dus
Careers

Employers are always on the hunt for Lincoln graduates and our degrees open doors. Learn about some of the career opportunities that could come knocking once you’ve finished studying.

Agricultural/Horticultural Scientist
Kaiputāiao Ahuwhenua

Agricultural/horticultural scientists study farm animals, soils, pastures and crops to improve growth, health and quality, and to prevent pests and disease.

Pay
Pay for agricultural/horticultural scientists varies depending on qualifications, experience, and the type of work they do:
- Graduates with a doctorate usually earn $65,000 to $75,000 a year.
- After three to five years, agricultural/horticultural scientists usually earn $75,000 to $90,000.
- Senior agricultural/horticultural scientists may earn $80,000 to $150,000.

What you will do
Agricultural/horticultural scientists may do some or all of the following:
- research and advise on animal or plant diseases, pest control, and chemical use
- develop better methods of managing farms and orchards
- study the effects of agriculture and horticulture on the environment
- oversee new projects and field research
- research and write reports based on field study, and present results
- share research findings with other scientists, companies and government agencies
- write applications for research funding and manage budgets
- train and supervise lab technicians, research teams and field workers
- make sure all scientific work meets legal requirements.

Working conditions
Agricultural/horticultural scientists:
- usually work regular business hours.
- They may work irregular or longer hours when doing fieldwork and research.
- work in offices, laboratories and glasshouses, and on farms, orchards and nurseries.
- may travel locally to talk to farmers and growers, and overseas to attend conferences or work on international research projects.

Entry requirements
To become an agricultural/horticultural scientist, you need a doctorate in science in an area such as:
- agricultural science
- microbiology
- biochemistry

Agricultural/horticultural scientists in research positions usually apply for a postdoctoral fellowship after completing a doctorate.

You may need to do two or three postdoctoral fellowships (usually lasting two or three years each) before getting a permanent scientist position.

Personal requirements
Agricultural/horticultural scientists need to be:
- accurate
- observant
- organised
- decisive
- good at solving problems
- good at communicating
- practical
- able to work well alone and in a team.

What are the chances of getting a job?
Good demand for agricultural/horticultural scientists
Growing demand means opportunities for agricultural/horticultural scientists are good.

According to the Ministry of Business, Innovation and Employment, the amount of work for scientists has been increasing. It is expected to grow significantly until 2023, and then continue growing at 1.8% per year until 2028.

According to the Census, 714 agricultural/horticultural scientists worked in New Zealand in 2018.

Increased funding means more jobs for agricultural/horticultural scientists
In the 2019 Budget, the Government announced increased funding for some primary sector areas. As a result, opportunities for agricultural/horticultural scientists are best in:
- animal welfare
- biosecurity
- environment and conservation
- food safety
- sustainable land use.

Chances in these areas are particularly good for agricultural/horticultural scientists with experience in:
- analysing and monitoring climate and environmental conditions
- producing research and reports that inform government policy and legislation
- researching and monitoring sustainable land and water use
- scientific development, research and innovation projects.

Demand is strongest for scientists who specialise in environmental research.

Types of employers varied
Agricultural/horticultural scientists may work for:
- agricultural and horticultural equipment suppliers
- animal and plant feed developers and manufacturers
- chemical companies producing fertilisers and similar products
- consultancy companies – for example, those doing environmental assessments for resource consents
- government departments and local councils
- universities and research institutes.

This information is a guide only.
Last updated 6 December 2019
Environmental Scientist
Kaipūtaiao Ao Tūroa

Environmental scientists study human impacts on the environment such as climate change, pollution and loss of biodiversity. They also advise on how to avoid or reduce these harmful effects.

Pay
Pay for environmental scientists varies depending on skills, experience and the type of work they do:
• Graduate environmental scientists usually start on about $58,000 to $90,000 a year.
• Senior environmental scientists with a Masters and five years’ experience can earn up to $108,000.
• Environmental scientists with a postdoctoral degree who work at research institutes can earn from $85,000 to $150,000.

What you will do
Environmental scientists may do some or all of the following:
• Study plants and animals in their environment
• Assess sources of soil, water and air pollution, and develop ways to control these
• Use computer modelling techniques to predict future events in the ecosystem
• Study soil types and suitable fertilisers
• Study how to alter soils to suit different plants
• Develop efficient irrigation, drainage and waste disposal methods
• Plan and run field studies and experiments
• Prepare reports on the environmental impacts of activities such as mining, forestry and agriculture
• Report results of studies in science journals and in conferences
• Study and develop environmental policies
• Provide technical advice to clients or local government authorities
• Prepare applications for resource consent on behalf of clients, in compliance with the Resource Management Act.

Working conditions
Environmental scientists:
• Usually work regular business hours, but may be required to work weekends and evenings to meet deadlines
• Usually work in offices, but may work outdoors when collecting samples or visiting sites
• May travel nationally and overseas to work on projects.

Entry requirements
To become an environmental scientist, you usually need to have a Master’s degree in one of the following areas, depending on your specialisation:
• Environmental science or a related area such as chemistry or engineering
• Ecology or a related area such as botany or zoology
• Soil science or a related discipline such as earth science.

A PHD is usually required for research-based positions.

Personal requirements
Environmental scientists need to be:
• Accurate
• Able to make good judgements
• Good at problem solving
• Good at planning and organising
• Good at communicating
• Creative, so they can develop new ideas.

What are the chances of getting a job?
Strong demand for environmental scientists

Environmental research scientist appears on Immigration New Zealand’s long-term skill shortage list. This means the Government is actively encouraging skilled environmental scientists from overseas to work in New Zealand.

Good opportunities in a range of industries
There are good opportunities for environmental scientists with a policy or evaluation focus to work for primary sector industries on land or at sea, regional and local councils, and government environmental ministries and agencies.

There is high demand for environmental scientists who can monitor the impacts of industrial activities on the environment, manage resource consents, provide advice on minimising environmental footprints, and consult and engage with stakeholders.

Types of employers varied
Environmental scientists who do academic research mainly work for:
• Crown research institutes
• Government departments such as Landcare Research or Department of Conservation
• Universities.

Environmental scientists who do policy or evaluation work may be employed by:
• Regional, city and district councils
• Government departments and Crown entities
• Private consultancies and companies.

Food Technologist
Kalihangarau Kai

Food technologists research, develop and improve food and drink products. They may also be involved in the processing, packaging, storage and safety of food to meet government and industry standards.

Pay
Pay for food technologists varies depending on skills and experience:
• Graduate food technologists usually earn $50,000 to $60,000 a year.
• Food technologists with two to four years’ experience usually earn $60,000 to $75,000.
• Senior food technologists with five or more years’ experience can earn $75,000 to $100,000.

What you will do
Food technologists may do some or all of the following:
• Develop new or improve current food and drinks
• Make test samples of food products and conduct trials
• Source and select ingredients for food products
• Manage or supervise development and production of food and drinks
• Improve efficiency of manufacturing processes
• Develop new or improve current food packaging
• Ensure food products meet specifications and standards (quality assurance)
• Investigate the nutritional properties of foods.

Working conditions
Food technologists:
• Usually work regular business hours, but may need to run factory trials at night or on weekends
• Usually work in laboratories, offices or factories
• May travel overseas to clients’ companies or factories, and attend local or international conferences and trade shows.

Entry requirements
To become a food technologist most employers require you to have a Bachelor’s degree in food technology, food science or food engineering. A Master’s degree is preferred.
• Food technologists often complete on-the-job training programmes for specific products and processes.

Personal requirements
Food technologists need to be:
• Accurate
• Patient and persistent
• Able to work well under pressure
• Good at problem solving
• Good at planning and organising.

What are the chances of getting a job?
Shortage of skilled food technologists
Demand for food technologists is expected to continue as the number of positions will grow 3% a year until 2026, according to the Ministry of Business, Innovation and Employment. Demand is strongest for qualified food technologists with three to seven years’ experience.

However, the number of skilled, qualified food technologists is insufficient to meet demand. As a result, food technologist appears on Immigration New Zealand’s long-term skill shortage list. This means the Government is actively encouraging skilled food technologists from overseas to work in New Zealand.

Strong prospects for graduates with process engineering knowledge and industry experience

Some large food technology companies may have graduate recruitment programmes. Employers prefer graduates with broader qualifications that include some process engineering, rather than just food science.

A postgraduate diploma can improve your chances of getting work if it includes an applied project for a food manufacturing company and getting hands-on industry experience.

Types of employers varied
Most food technologists work for:
• Food manufacturing companies such as dairy processing companies, breweries, food and vegetable processing companies, cereal manufacturers and commercial bakeries
• Private food research institutes such as Fonterra Research and Development Centre
• Crown research institutes such as AgResearch and Plant & Food Research
• Universities.

26 Lincoln University — Careers www.lincoln.ac.nz

27
**Orchard Farmer/Manager**

**Orchard farmers/managers plan and manage fruit and nut production in orchards.**

**Working conditions**
- Orchard farmers/managers: Usually work between eight and 10 hours a day, but during peak seasonal harvest and planting times may work longer hours, including weekends.
- Work outdoors or in packhouses and offices.
- Work in all weather conditions, with machinery and chemicals that can be dangerous.
- May have to travel locally between orchards and to markets or suppliers.

**Entry requirements**
- There are no specific entry requirements to become an orchard farmer/manager but a diploma or science degree in horticulture is recommended.

**Types of employers**
- Orchard farmers/managers can work for private orchard owners, businesses or grower companies that may own one or more orchards.
- Orchard farmers/managers can also be self-employed and own their own orchards.

**What you will do**
- orchards are getting larger and more complex, and require advanced soil and orchard management skills to achieve greater productivity.

**High competition for orchard farmer/manager positions**
- Staff turnover is low for orchard farmer/manager positions so competition can be high when vacancies arise.
- However, it can still be difficult to find suitable people for orchard manager vacancies due to lack of experience and expertise.

**What are the chances of getting a job?**
- Growing demand for orchard farmers/managers

**Demand for orchard farmers/managers is increasing as the horticulture industry continues to grow.**
- Orchard farmers/managers are particularly in demand because:
  - there are not enough New Zealanders available to do the work.
  - The horticulture industry is expected to grow and increase its export revenue to over $5 billion in 2023.

**Pay**
- Pay for orchard farmers/managers varies depending on:
  - Orchard size
  - Orchard profitability, which may vary from season to season
  - Prices received for the fruit or nuts.
  - Orchard farmers/managers with up to five years' experience usually earn between $55,000 and $110,000 a year.
  - Orchard farmers/managers who work for large organisations can earn between $120,000 and $180,000.

**Flavour of the month**
- The horticulture industry is expected to grow and increase its export revenue to over $5 billion in 2023.
- Orchard farmers/managers: Usually work between eight and 10 hours a day, but during peak seasonal harvest and planting times may work longer hours, including weekends.
- Work outdoors or in packhouses and offices.
- Work in all weather conditions, with machinery and chemicals that can be dangerous.
- May have to travel locally between orchards and to markets or suppliers.

  - there are not enough New Zealanders available to do the work.
  - The horticulture industry is expected to grow and increase its export revenue to over $5 billion in 2023.
Science Technician
Kaihangarau Putaiao

Science technicians help scientists carry out research, testing and experiments in areas such as chemistry, earth sciences, life sciences, and physical sciences.

Pay
Pay for science technicians varies depending on their type of work, such as agricultural, chemistry, medical, life science or earth science. Science technicians earn an average of $52,000 a year.

What you will do
Science technicians may do some or all of the following:
- Collect and collate data for research
- Prepare equipment, materials, products and specimens for experiments and surveys
- Perform experiments and evaluate the results
- Record what happens during experiments, and the conclusions reached
- Set up, operate and maintain laboratories for teaching and research
- Help with or carry out field and site surveys and tests
- Write reports and papers on research results
- Maintain databases
- Order laboratory supplies and equipment.

Working conditions
Science technicians:
- Usually work regular business hours, but may also work evenings and weekends
- Work in laboratories at universities, schools, research institutes and factories. They may also work in offices, glasshouses, nurseries, forests, or on farms
- May travel to work on projects or attend conferences.

Entry requirements
To become a science technician you need to have a relevant science or technology qualification. Some employers require you to have a Bachelor of Science or a Master’s degree in the relevant area of specialisation.

Personal requirements
Science technicians need to be:
- Good at research
- Enquiring and observant
- Patient and safety-conscious
- Good problem solvers
- Good written and verbal communicators
- Organised, with good planning skills
- Able to work well both individually and as part of a team.

What are the chances of getting a job?
Number of science technicians expected to grow slowly
The outlook for science technicians is improving as research funding increases. The number of science technicians is expected to grow slowly until 2025.

Opportunities for science technicians are best in applied sciences that develop new technologies, products and services. The applied areas the Government has prioritised are:
- Food research
- Biological industries
- Health
- Environment
- High-value manufacturing and services (for example, making specialised medical equipment).

Types of employers varied
Science technicians can work for a range of companies or organisations such as:
- Crown research institutes
- Universities, polytechnics and schools
- Private sector companies such as private research institutes or processing laboratories.

This information is a guide only. Last updated 13 May 2021

I decided to study food science because I’m interested in nutrition and am wanting to work in that area.

Lauryn Hippolite
Currently studying for a Bachelor of Science (Food Science)
Technical Writer
Kaitito Hangarau

Technical writers create content for printed and online media, such as user guides, manuals, intranet and website pages, and present it in a way that can be easily accessed and understood.

**Working conditions**
Technical writers:
- Usually work regular business hours, but may be required to work long or irregular hours depending on project deadlines.
- Usually work from offices but may work from home if self-employed.

**Entry requirements**
There are no specific entry requirements to become a technical writer. However, excellent writing skills are required and most employers look for people with a tertiary qualification such as an English degree or certificate in technical communication.

Tertiary qualifications in subjects such as science, engineering, electronics, computer science or commerce are valuable for technical writers in industries where this subject knowledge is required.

**Personal requirements**
Technical writers need to be:
- Excellent communicators, both in writing and orally
- Quick learners
- Approachable, and able to relate to a wide variety of people
- Good at planning, time management and project management
- Methodical, persistent and determined.

**Pay**
Pay for technical writers varies depending on their skills, experience, and where they work.

- New technical writers usually earn between $50,000 and $60,000 a year.
- Technical writers with one to four years’ experience usually earn between $60,000 and $100,000.
- Experienced technical writers in management positions can earn between $100,000 and $130,000.
- Self-employed technical writers usually earn between $35 and $110 an hour.

**What you will do**
Technical writers may do some or all of the following:
- Work with managers, developers, users and other interested parties to identify their information needs
- Plan, research and create clear, accurate content such as instructions, standard operating procedures, forms and policies
- Create content in various forms such as video, web, audio, hard copy and interactive learning
- Analyse work tasks, and manage documentation projects
- Design the layout and structure of documents
- Create language and style guides
- Design and draw business, scientific or technical diagrams/charts
- Edit work of other writers for consistency and clarity
- Test content for its usability
- Manage translations.

**What are the chances of getting a job?**
Strong demand for technical writers

**Zoologist**
Kaiputahiai Kararehe

Zoologists study animals and their behaviour in the wild or in captivity, and how they interact with other species and their environments.

**Working conditions**
Zoologists:
- Usually work regular business hours, but may also work evenings and weekends.
- Work in laboratories, offices, and outdoors in areas such as national parks and wildlife reserves.
- May work with drugs and chemicals and be exposed to animal diseases.
- May work outdoors in all weather conditions.
- Often travel locally, nationally and overseas to work on projects or to attend conferences.

**Pay**
Pay for zoologists varies depending on qualifications, experience and where they work.

- Zoologists working in universities:
  - Zoology assistant lecturers and junior researchers usually earn between $56,000 and $61,000 a year.
  - Lecturers in zoology and research officers usually earn between $61,000 and $124,000.
  - Zoology professors can earn between $124,000 and $185,000.

- Zoologists working in government research agencies:
  - Zoology technicians usually earn between $42,000 and $52,000 a year.
  - Senior zoology technicians usually earn between $52,000 and $61,000.
  - Zoology scientists usually earn between $61,000 and $117,000.
  - Senior zoology scientists can earn between $117,000 and $140,000.

Zoologists working in the private sector may earn more than this.

**What you will do**
Zoologists may do some or all of the following:
- Study animals and their behaviour
- Study the relationship between animals and their environment
- Do research into areas such as pest control or conservation
- Do laboratory work and fieldwork
- Manage the care of animals in research centres, zoos and aquariums
- Teach university students
- Write reports and scientific articles
- Give talks to community groups and local authorities
- Advise local authorities and iwi on how to manage animal species sustainably.

**Types of employers varied**
Employers of technical writers include:
- Private companies
- Government agencies
- Computer companies and software developers
- Electronics and equipment manufacturers.

Many technical writers are self-employed and work on contract.

**Entry requirements**
To become a zoologist, you need to have a Bachelor of Science majoring in any of the following subjects:
- Ecology
- Zoology
- Microbiology
- Biotechnology
- Molecular biology.
- Postgraduate qualifications, such as a Master’s degree or PhD, are recommended for those wanting to work in senior research roles.

For research-based work at the technician level, a bachelor’s degree in a related science subject is the minimum entry requirement. Though many skills are learned at university, zoologists continue to develop their laboratory and experimental skills on the job.

**Personal requirements**
Zoologists need to be:
- Enquiring and observant
- Practical and accurate
- Patient and logical
- Good at problem solving
- Well organised, with good planning skills
- Skilled at writing and presenting information
- Good at research
- Able to cope with experimenting on live animals.

**What are the chances of getting a job?**
Small numbers of zoologists

There are limited opportunities for zoologists and roles are mainly within universities or crown research institutes.

According to Stats NZ, the number of zoologists in New Zealand is around 100.

Zoology graduates tend to use their qualification in a variety of applied zoology roles in fields such as teaching, environmental research and pharmaceutical research.

**Good opportunities for zoology graduates in environmental research**
Job opportunities in environmental research are good for zoology graduates due to an increased need to protect the natural environment and a shortage of people with suitable qualifications.

Environmental research scientist appears on Immigration New Zealand’s long-term skill shortage list. This means the Government is actively encouraging skilled environmental research scientists from overseas to work in New Zealand.

**Types of employers varied**
Zoologists can work for:
- Crown research institutes (CRIs) such as NIWA
- Government agencies such as the Department of Conservation
- Consultancies, including those studying environmental impacts of building developments
- Private companies, including those doing pest control
- Regional councils
- Museums
- Universities.

This information is a guide only. Last updated 12 May 2021.
Sofia Echeuerria
Mexico
Bachelor of Science (Food Science)

Sofia looked at programmes all over the world, but ultimately chose Lincoln’s Bachelor of Science (Food Science), due to the university’s solid reputation and her desire to live in beautiful New Zealand.

“I really liked the look of life in New Zealand and I was impressed with the sound of the food science degree at Lincoln,” she says.

Hailing from the buzzing metropolis of Mexico City, Sofia describes Lincoln as “a really calm place”.

“It was so relaxing. I loved it. It was such a contrast from the big, bustling city that I came from. The people were great and it’s amazing to be able to make friends from all over the world.”

Her degree prepares students to be drivers of the economy of the future, giving them the scientific and personal skills to make them highly employable all over the world.

Guest speakers from the food industry mean that the students are able to meet potential employers as soon as they begin studying.

Sofia was impressed with the variety of opportunities she’s been given at Lincoln, including the chance to meet new people and travel with them during her holidays, join campus clubs (such as the tramping and Latin clubs), and plan for a fulfilling career.

“I really enjoyed the whole experience of being in a new country by myself and living in the Halls of Residence on campus,” she says. “It helped me to grow in so many ways.”
Graduate pathways

Laura Keenan
Bachelor of Agricultural Science (First Class Honours)
Director and Senior Consultant, KS Agri
Laura says her Lincoln degree thoroughly prepared her for roles in the primary sector.
After graduating in 2015 with a Bachelor of Agricultural Science (First Class Honours), Laura Keenan moved straight into a position as a Farm Environmental Consultant at a soil consultancy company.
She is now a director of KS Agri, an agricultural consultancy which she co-founded and where she is also a senior consultant. It offers farmers advice on nutrient management, freshwater farm plans, consent applications, auditing and facilitation.
“I found the agricultural and agribusiness courses really enjoyable and relevant to a future career. The research facilities are excellent as well. Completing a dissertation and research project also allowed me to grasp all elements of academic research and its importance in New Zealand agriculture.”
In 2018 she was awarded the Emerging Rural Professional of the Year award at the NZIPIM national conference and she started a PhD at Lincoln University in 2020 where she is focusing on improving the profitability of farm systems and environmental outcomes when using forage crops.

Kelsi Gough
Bachelor of Agricultural Science (First Class Honours)
Area Manager, Auckland Hauraki Region, FMG Insurance
Our excellent reputation in the agricultural sector was a major reason why Kelsi Gough chose to study with us. However, her decision was cemented when she heard a number of former students reminiscing fondly about their Lincoln days.
“This is what tipped the scales in favour of attending Lincoln over other universities offering similar courses,” she says.
Kelsi graduated in 2013 with a Bachelor of Agricultural Science (First Class Honours) and accepted a role in the graduate programme for FMG, which she describes as New Zealand’s leading insurer.
She says she enjoyed the variety of courses available to her at Lincoln.
“As there aren’t many prerequisites in the Agricultural Science degree, the direction you take is really up to you. During my four-year programme, I studied a diverse range of subjects, including soil, animal and plant sciences, farm management, law, economics and rural valuation.”

Len Ibbotson
Bachelor of Viticulture and Oenology
Technical Services Lead (Horticulture), Syngenta Australia and New Zealand
Len Ibbotson, originally from Hawke’s Bay, chose to study for a Bachelor of Viticulture and Oenology, as the programme of study offered him the exact training he was looking for.
“Studying at Lincoln offered a good opportunity to travel to the South Island, which I wanted to do. It also made sense to study plants at a university with a strong land-based history,” he says.
He was impressed with the choice and variety of courses available and says the lecturers and staff were enthusiastic, personable and very approachable.
Len says the most valuable aspect of his study was the balance between plant and wine science, and the practical wine and grape management tools he received.
“I have found that my degree is highly relevant to the wine-growing industry and provides sound theoretical knowledge, which enables recruitment and development,” he says.
Len still keeps in touch with staff and friends from Lincoln and says he loved meeting many interesting people on campus.

Laura says her Lincoln degree thoroughly prepared her.

I found the agricultural and agribusiness courses really enjoyable and relevant to a future career.

Lincoln University — Growing careers
Graduate pathways

Erin McIlmurray (nee Quinn-Walsh)
Bachelor of Science (Hons)
Senior Development and Solutions Specialist, DairyNZ

Erin McIlmurray was always fascinated by science and enjoyed studying biology. “I really like to explore the world, concepts, ideas – anything and everything. I like to experiment to find out why things do or don’t work, and I love problem-solving.”

Erin’s passion led her to study for a Bachelor of Science. She graduated with Honours and started working at Livestock Improvement Corporation as a research assistant. Erin was able to apply her Honours research directly to her role. “I was involved in developing the breeding scheme for LIC’s subsidiary Deer Improvement. My honours project was in deer reproduction, and my courses provided me with a good base understanding of epigenetics. This was an excellent first role for me to have.”

When the opportunity arose to progress to a strategy analyst role, Erin was prepared. “My science degree meant that I could translate ‘science’ to others in the business and look at data and deriving stories which others can understand.”

Erin’s advice for prospective students is that a science degree can lead to many different opportunities. “A science degree doesn’t mean that you have to work in science for the rest of your life. While it’s a good place to start, a science degree teaches you a way of thinking that will be invaluable for the rest of your career.”

A science degree doesn’t mean that you have to work in science for the rest of your life. While it’s a good place to start, a science degree teaches you a way of thinking that will be invaluable for the rest of your career.

Steve Pawson
Bachelor of Parks, Recreation and Tourism Management; Bachelor of Science (Conservation and Ecology); Master of Applied Science
Senior Lecturer in Entomology, University of Canterbury

Steve Pawson attended Inglewood High School, and was initially drawn to Lincoln University to study for the Bachelor of Parks, Recreation and Tourism Management. While he was studying, he discovered an interest in conservation and ecology and opted to conjointly study a Bachelor of Science.

“When the conjoint programme was very valuable, in that it gave huge breadth to my undergraduate studies, which has given me many skills to draw on in my current career.”

Steve furthered his study at Lincoln University with a Master of Applied Science, following which he pursued a PhD. He landed as an Entomology Research Leader with Scion, where he managed a research team working on forest pest species. He is currently a Senior Lecturer in Entomology at the University of Canterbury.

Reflecting on the importance of Lincoln University’s “small and intimate” campus, Steve recommends that students experience the culture by living in Lincoln, or nearby. It is something he regrets not doing.

Hymmi Kong
Bachelor of Science
Technical Business Analyst, Orion Health

Hymmi Kong decided to attend Lincoln University following a recommendation from her older sister, who is also a Lincoln graduate. She received her Bachelor of Science degree in 2015 and worked at Plant and Food Research during the summer break, before returning to Lincoln as an Honours student.

During her undergraduate studies, she particularly enjoyed participating in practical exercises, including lab sessions and field trips, as well as visiting farms and laboratories. Hymmi appreciated the fact that the computer labs in the Landscape Architecture building were usually open until late at night, which allowed for flexible study hours. She also enjoyed the gym facilities and group exercise classes, and says they helped her to release stress after a long day.

Originally from Hong Kong, she is thrilled to have met a lot of fellow international students on campus and says spending time socialising with them has added a great deal of extra joy to her university life. “We love having gatherings in the weekends, as well as going on road trips during the breaks. We share different stories to do with our lives and learn all about the cultures of different countries,” she says.
Go beyond textbooks and the classroom and enjoy a range of practical learning opportunities as part of your degree.

Many of our programmes have a practical work component. It’s considered a crucial aspect of study for some courses and offers experiences in a broad range of relevant careers. You’ll normally carry out practical work during summer breaks and it will be closely linked to the lecture material in your study programme. While it’s your responsibility to find practical work placements, the Practical Work Coordinator can help by putting you in touch with employers who are already connected with us. You’re strongly encouraged to seek out a diverse range of practical work opportunities.

Why practical work?
Practical work will:
• Complement your studies and enhance the marketability of your qualification
• Give you a chance to experience new learning environments
• Expose you to the appropriate industry environment, including its technical, economic and social environments
• Teach you to perform a range of tasks specific to the industry environment including skills in observation, information gathering, data analysis, and report writing
• Equip you with more knowledge of industry employment opportunities.

I’m a hands-on person, so practical work gives me a better understanding of the course content.

Kylie Lyders

For more information, please contact the Practical Work Coordinator at practicalwork@lincoln.ac.nz or +64 3 423 0061. Ask for a practical work handbook.
Key Dates and Events

Here are some of the events you won’t want to miss as you consider your Lincoln journey.

Information Evenings
A chance to chat with academics from our areas of specialisation, network with existing students and find out more about accommodation, scholarships and student wellbeing and experience in a relaxed atmosphere in a city venue with nibbles and beverages.

Hui Whakatuwhera Open Day
A whole day when you can tour our campus and learn why Lincoln University is such a great place to study with subject presentations and lecturers and students available to answer all of your questions.

Scholarship applications
We have hundreds of scholarships available, but Lincoln scholarships like Future Leader and Sports Scholarships close in August. You can check them all out on our website see if you meet the criteria, and find out all the closing dates.

Enrolments
Enrolments open in October but you can apply anytime. Once we have offered you a place and you have accepted them you can begin your enrolment.

Halls application start/finish and moving in
Do you want to live on campus and get the full "Lincoln experience"? Halls applications open in October and move in is in February.

Rā Whakawhanaukataka - Orientation Day
Rā Whakawhanaukataka-Orientation Day brings together our new students to celebrate the start of their Lincoln University journey. You’ll meet other students, learn what it means to belong to the Lincoln whānau and find out what to expect in your first lectures.

Preparation Week
Preparation Week is the perfect time for new and existing students to get assistance with completing to-do lists (including enrolment) and find your way around campus before the start of lectures.

Make sure you go to www.lincoln.ac.nz/key-dates for more info and the exact dates these exciting events take place.
Apply and enrol at www.lincoln.ac.nz/apply

Ready. Set. Grow.

Lincoln University
Te Waihora Campus
Ellesmere Junction Road/Springs Road
PO Box 85084, Lincoln University
Lincoln 7647
Canterbury, New Zealand
E: grow@lincoln.ac.nz
P: 0800 10 60 10 (NZ)

www.lincoln.ac.nz

Campus Tours
We offer personalised guided campus tours with an individualised itinerary so you can experience the parts of campus that interest you the most. Tours take about 60 minutes.
To book your tour, get in touch with one of our Student Liaison Officers. Send us your contact details along with a list of your interests and we’ll be in touch.

International Office
The International Office promotes and markets Lincoln University to prospective international students and works with its global network of education agents to provide high quality customer service. We also support students with programme and course advice and help students through the University’s applications and enrolment processes.
